## **Writing Space The Computer Hypertext And The History Of Writing:**

**Writing Space** Jay David Bolter,1991      *Writing Space* J. David Bolter,2011      **Writing Space** J. David Bolter,1991  
This book is a study of the computer as a new technology for reading and writing a technology that may replace the printing press as our principal medium of symbolic communication One of the main subjects of *Writing Space* is hypertext a technique that allows scientists scholars and creative writers to construct texts that interact with the needs and desires of the reader Bolter explores both the theory and practice of hypertext demonstrating that the computer as hypertext represents a new stage in the long history of writing one that has far reaching implications in the fields of human and artificial intelligence cognitive science philosophy semiotics and literary theory Through a masterful integration of introductory historical illustrative and theoretical material as well as an accompanying diskette containing a sample of hypertextual writing Bolter supports his claim that the computer will carry literacy into a new age the age of electronic text that will emerge from the age of print that is now passing His reflections on literacy in contemporary culture lead him to a compelling conclusion ironically cultural literacy is becoming almost synonymous with computer literacy      *Writing Space* Jay David Bolter,2001  
This completely updated volume continues the work of the first edition showing how hypertext and other forms of electronic writing remediate forms genres of print For students in composition technology information studies      *Writing Space* Jay David Bolter,1991      **Digital Writing Technologies in Higher Education** Otto Kruse,Christian Rapp,Chris M. Anson,Kalliopi Benetos,Elena Cotos,Ann Devitt,Antonette Shibani,2023-09-14 This open access book serves as a comprehensive guide to digital writing technology featuring contributions from over 20 renowned researchers from various disciplines around the world The book is designed to provide a state of the art synthesis of the developments in digital writing in higher education making it an essential resource for anyone interested in this rapidly evolving field In the first part of the book the authors offer an overview of the impact that digitalization has had on writing covering more than 25 key technological innovations and their implications for writing practices and pedagogical uses Drawing on these chapters the second part of the book explores the theoretical underpinnings of digital writing technology such as writing and learning writing quality formulation support writing and thinking and writing processes The authors provide insightful analysis on the impact of these developments and offer valuable insights into the future of writing Overall this book provides a cohesive and consistent theoretical view of the new realities of digital writing complementing existing literature on the digitalization of writing It is an essential resource for scholars educators and practitioners interested in the intersection of technology and writing      *Rhetorical Delivery as Technological Discourse* Ben McCorkle,2012-01-19 According to Ben McCorkle the rhetorical canon of delivery traditionally seen as the aspect of oratory pertaining to vocal tone inflection and physical gesture has undergone a period of renewal within the last few decades to include the array of typefaces color palettes graphics and other design elements used to convey a message to a chosen audience McCorkle posits that this redefinition while a

noteworthy moment of modern rhetorical theory is just the latest instance in a historical pattern of interaction between rhetoric and technology In *Rhetorical Delivery as Technological Discourse A Cross Historical Study* McCorkle explores the symbiotic relationship between delivery and technologies of writing and communication Aiming to enhance historical understanding by demonstrating how changes in writing technology have altered our conception of delivery McCorkle reveals the ways in which oratory and the tools of written expression have directly affected one another throughout the ages To make his argument the author examines case studies from significant historical moments in the Western rhetorical tradition Beginning with the ancient Greeks McCorkle illustrates how the increasingly literate Greeks developed rhetorical theories intended for oratory that incorporated writerly tendencies diminishing delivery's once prime status in the process Also explored is the near eradication of rhetorical delivery in the mid fifteenth century the period of transition from late manuscript to early print culture and the implications of the burgeoning print culture during the nineteenth century McCorkle then investigates the declining interest in delivery as technology designed to replace the human voice and gesture became prominent at the beginning of the 1900s Situating scholarship on delivery within a broader postmodern structure he moves on to a discussion of the characteristics of contemporary hypertextual and digital communication and its role in reviving the canon while also anticipating the future of communication technologies the likely shifts in attitude toward delivery and the implications of both on the future of teaching rhetoric *Rhetorical Delivery as Technological Discourse* traces a long view perspective of rhetorical history to present readers a productive reading of the volatile treatment of delivery alongside the parallel history of writing and communication technologies This rereading will expand knowledge of the canon by not only offering the most thorough treatment of the history of rhetorical delivery available but also inviting conversation about the reciprocal impacts of rhetorical theory and written communication on each other throughout this history

**Transferred Illusions** Professor Kathryn Sutherland, Professor Marilyn Deegan, 2012-10-01 This is a study of the forms and institutions of print newspapers books scholarly editions publishing libraries as they relate to and are changed by emergent digital forms and institutions In the early 1990s hypertext was briefly hailed as a liberating writing tool for non linear creation Fast forward no more than a decade and we are reading old books from screens It is however the newspaper for around two hundred years print's most powerful mass vehicle whose economy persuasively shapes its electronic remediation through huge digitization initiatives dominated by a handful of centralizing service providers funded and wrapped round by online advertising The error is to assume a culture of total replacement The Internet is just another information space sharing characteristics that have always defined such spaces wonderfully effective and unstable loaded with valuable resources and misinformation that is both good and bad This is why it is important that writers critics publishers and librarians in modern parlance the knowledge providers be critically engaged in shaping and regulating cyberspace and not merely the passive instruments or unreflecting users of the digital tools in our hands **Hypermedia**
