# The Birth & Rebirth of Pictorial Space

John White

# The Birth And Rebirth Of Pictorial Space

**John White**

## **The Birth And Rebirth Of Pictorial Space:**

**The Birth and Rebirth of Pictorial Space** John White,1987 Professor White s historical study of the rediscovery of pictorial space during the Renaissance and of its origins in antiquity was acclaimed when it first appeared It opened up important new avenues of research and exploration It has remained a seminal work and he has now brought it fully up to date for a third edition He has included a substantial new appendix on Leonardo Brunelleschi and the viewing distance

*The Birth and Rebirth of Pictorial Space* John White,1967      **The Birth and Rebirth of Pictorial Space** 1924-White,1967      **The Birth and Rebirth of Pictorial Space** John White,1957      **The Birth and Rebirth of Pictorial Space** John White (historien d'art.),1972      *The Birth and Rebirth of Pictorial Space. (Second Edition.)*. John Edward Clement Twarowski WHITE,1967      Varieties of Realism Margaret A. Hagen,1986-05-31 Varieties of Realism argues that it is not possible to represent the layout of objects and surfaces in space outside the dictates of formal visual geometry the geometry of natural perspective The book examines most of the world s coherent representational art styles both in terms of the geometry of their creation and in terms of their perceptual effects on the viewer A lucid exposition of modern geometrical principles and relations accessible to the nonmathematical reader is followed by an analysis of all known styles as variants of natural perspective as true varieties of realism Delineating the physical and mechanical constraints that determine the act of visual representation in painting and drawing the author traces the intimate relations among seemingly distant styles and considers the kind of perceptual information about the world each can carry Margaret Hagen is a perceptual psychologist with an ecological point of view Her rigorous but readable presentation of visual theory and research offers provocative new insights into the connections among vision geometry and art      *The Rule of Art* Clark Hulse,1990 What do Renaissance poetry and painting have in common What are the social ideological and aesthetic bases for the links between them And what role do those links play in creating the humanistic culture that still has power over us today These are the questions Clark Hulse takes up in this sophisticated interdisciplinary study of Renaissance aesthetics Proposing an archeology of artistic knowledge Hulse examines the theoretical language through which the poets painters and patrons of the Renaissance conceived of the relationship between the arts That language is embedded in what he calls a rule of art a specific set of categories assumptions and practices that defined the two art forms and the relationship between them Hulse charts the rise of both forms to the status of liberal arts requiring special intellectual training for artist and patron alike In the process he uncovers the history of the practice of theory in the Renaissance revealing how artistic discourse lived in the world      The Birth and Rebirth of Pictorial Space John White,1957 Professor White s historical study of the rediscovery of pictorial space during the Renaissance and of its origins in antiquity was acclaimed when it first appeared It opened up important new avenues of research and exploration It has remained a seminal work and he has now brought it fully up to date for a third edition He has included a substantial new appendix on Leonardo Brunelleschi and the viewing distance John White is Pro

Provost for External Affairs and formerly Professor of History of Art at University College London This book is intended for students of history of art and of the Renaissance

**The Word made Visible in the Painted Image** Stephen Miller, 2015-11-25 This book explores the areas of perspective proportion witness and theological threshold in the devotional art of the Italian Renaissance with particular reference to the painted image of Christ While the Incarnation in a very real way legitimised the idea of the portrayal of God in human form as Jesus Christ problems remained as to how this might be achieved and whether it should be restricted to the second person of the Holy Trinity This book looks at the creation of pictorial space and the presentation of the image paying special attention to schemes of perspective as a way to better describe reality as well as to considerations of proportion through such geometric methodology as the Golden Section and dynamic root rectangles based on certain perfect or divine ratios to balance and harmonise form The Word Made Visible in the Painted Image also explores the theological theme of threshold and liminal space describes how themes such as the Incarnation and Revelation were represented and looks at the symbolism employed in so doing It shows how such themes were captured set in space and communicated in the painted image This study is necessarily interdisciplinary combining the subject areas of art history and theory theology biblical study philosophy aesthetics physics metaphysics mathematics geometry optics physiology psychology and sociology in greater and lesser degrees Few books take such an interdisciplinary stance on art theology science and related disciplines to this extent

Painterly Perspective and Piety John F. Moffitt, 2014-01-10 While the Renaissance is generally perceived to be a secular movement the majority of large artworks executed in 15th century Italy were from ecclesiastical commissions Because of the nature of primarily basilica plan churches a parishioner's view was directed by the diminishing parallel lines formed by the walls of the structure Appearing to converge upon a mutual point this resulted in an artistic phenomenon known as the vanishing point As applied to ecclesiastical artwork the Catholic Vanishing Point CVP was deliberately situated upon or aligned with a given object such as the Eucharist wafer or Host the head of Christ or the womb of the Virgin Mary possessing great symbolic significance in Roman liturgy Masaccio's fresco painting of the Trinity circa 1427 in the Florentine church of Santa Maria Novella analyzed in physical and symbolic detail provides the first illustration of a consistently employed linear perspective within an ecclesiastical setting Leonardo's Last Supper Venetian's St Lucy Altarpiece and Tome's Transparente illustrate the continuation of this use of liturgical perspective

*University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Authors & titles*

University of California (System). Institute of Library Research, University of California, Berkeley, 1972     *Spacing Law and Politics* Leif Dahlberg, 2016-04-20 Examining the inherent spatiality of law both theoretically and as social practice this book presents a genealogical account of the emergence and the development of the juridical In an analysis that stretches from ancient Greece through late antiquity and early modern and modern Europe and on to the contemporary courtroom it considers legal and philosophical texts artistic and literary works as well as judicial practices in order to elicit and document a series of critical moments in the history of juridical space Offering a more nuanced understanding of law than that found in traditional philosophical political or social accounts of legal history Dahlberg forges a critical account of the intimate relations between law and politics that shows how juridical space is determined and conditioned in ways that are integral to the very functioning and malfunctioning of law     *Modernities* Joseph Masheck, 1993 Joseph Masheck wants to take art historical and modern as a field of lively interrelations as if in random access memory retrieval rather than just second the motion that art history should be nonlinear and he takes the task of art criticism to be theory in practice Thus significant new art is represented in the thirty essays in *Modernities* besides already classic modern architecture sculpture and photography and contemporary painting by artists Alternating between a comprehensive sense of art history and engagement with the new and unplumbed contemporary arts he considers himself a kind of aesthetic double agent Because Masheck is concerned with the concrete standing of artworks he speculates on how works of art including Marcel Duchamp s ready made relate to other things More general themes range from the origin of the modern sense of form in prehistoric art to the historical underpinnings of expressionism and on to latter day graffiti culture     *Mise-en-scène of Art History* Peter Weibel, 1989  
**Artibus Et Historiae** ,1982     *Catalogue* Harvard University. Graduate School of Design. Library, 1968
