The Future Of Migration:

The Future of Migration to Europe Matteo Villa, 2020-05-14 Even as the 2013-2017 migration crisis is increasingly in the past, EU countries still struggle to come up with alternative solutions to foster safe, orderly and regular migration pathways. Europeans continue to look in the rear-view mirror. This Report is an attempt to reverse the perspective by taking a glimpse into the future of migration to Europe. What are the structural trends underlying migration flows to Europe and how are they going to change over the next two decades? How does migration interact with specific policy fields such as development, border management and integration? And what are the policies and best practices to manage migration in a more coherent and evidence-based way?

The Future of Migration to GCC Countries Françoise De Bel-Air, Nasra M. Shah, 2025-11-21 This book provides an in-depth exploration of the evolving trends in South-South international migration to the Gulf Cooperation Council (GCC) countries. It presents a comprehensive analysis of migration dynamics from the perspectives of nationals, non-nationals, policymakers and prospective migrants. It highlights the multifaceted factors driving migration to the Gulf, including the transition from oil-dependent economies to knowledge-based industries and the shift from a reliance on low-wage migrant workers to the integration of highly skilled expatriates. It emphasizes the Gulf states as strategic destinations for the Arab and Asian middle classes, shaped by global dynamics such as the gig economy, cultural compatibility and socio-economic instability in migrants' countries of origin. Furthermore, the book offers a critical assessment of migration policies, focusing particularly on the inadequacies in safeguarding low-paid migrants while challenging the prevailing notion that migration to the Gulf is temporary and primarily economically driven. Through an examination of new employment patterns, migration flows and concepts of transnationalism, the book interrogates the future trajectories of Gulf societies. It is an indispensable resource for scholars interested in the region's transitions and future prospects.

International Migration and the Future of Populations and Labour in Europe Marek Kupiszewski, 2013-02-11 The changes of populations are determined by fertility, mortality and migration. On the national level, international migration is a factor of increasing demographic, economic, social and political importance. This book addresses the debate on the impact of international migration and economic activity on population and labour force resources in the future. It presents a study conducted for 27 European countries, looking 50 years ahead (2002-2052). An extended discussion of theories and factors underlying the assumed evolution of the components of change and economic activity is included, as well as a detailed analysis of the historical trends. These theoretical and empirical considerations lead to defining scenarios of future mortality, fertility, economic activity and international migration, which have been fed into a projection model producing various future population dynamics and labour force trajectories. In addition, simulations have been made to estimate the size of replacement migration needed to maintain selected demographic and labour market parameters in the countries of Europe. The results presented in this book allow researchers, governments and policy makers to evaluate to what extent various

migration and labour market policies may be instrumental in achieving the desired population and labour size and structures. The secondary purpose of this volume is to reveal the methodology and argumentation lying behind a complex population forecasting and simulation exercise which is not done frequently but is critical for the assessment of the forecasts and also valuable from a purely didactic point of view. *The Future of International Migration to OECD Countries* OECD, 2009-08-11. Looking to the year 2030 this volume explores the social economic and environmental forces which in OECD countries may combine to attract migrants of various types and backgrounds and which primarily in the developing world may persuade people to leave or stay at home. **Human Migration & the Future** John Walter Gregory, 1928. [The Global Economic Crisis and the Future of Migration: Issues and Prospects](#) Bimal Ghosh, 2012-12-03. The reason for the depth the 2008's global depression lies in the intractability of modern economic systems. This has led to an emergence of unprecedented migratory patterns the analysis and management of which is key to economic recovery. **Continuous Reporting System on Migration**, 1985. **Problems of the Future and Essays** Samuel Laing, 1890. **The Future of Israel and Judah** Joseph Wild, 1888. *Making Migration Work* Monique Kremer, Erik Schrijvers, 2025-10-01. The complexion of labour migration in the European Union EU has altered in recent years. Not only has there been a shift in the length of time labour migrants spend abroad but the nature scale and direction of the migration flows have also changed dramatically. The enlargements of the EU in 2004 and 2007 were influential in this respect. A growing economy and large wage gaps encouraged a large stream of workers to leave the new Member States for the old. The EU's open internal borders made it easy for them to return home or to move on to another Member State. This publication considers what this means for the future of labour migration and how policy should address this issue.
