Words In Time Diachronic Semantics From Different Points Of View:

    Words in Time Regine Eckardt,Klaus von Heusinger,Christoph Schwarze,2003 Meanings of words are constantly changing and the forces driving these changes are varied and diverse Linguistic analyses are usually concerned with language internal processes while investigations of language external historical developments tend to disregard linguistic considerations It is evident however that an investigation of diachronic semantics will have to consider both sides a specific theory of meaning including a proper place for lexical semantics on the one hand and incorporate knowledge about the world and the social and cultural environment of speakers who use language as a tool for communication on the other The collection focuses on meaning change as a topic of interdisciplinary research Distinguished scholars in diachronic semantics general linguistics classical philology philosophy of language anthropology and history offer in depth studies of language internal and external factors of meaning change This broad range of perspectives unprecedented in research publications of recent years is a pioneering attempt to mirror the multi facetteous nature of language as a formal social cognitive cultural and historical entity The contributions each exploring the research issues methods and techniques of their particular field are directed towards a broader audience of interested readers thus enhancing interdisciplinary exchange   **Words in Time** Regine Eckardt,Klaus von Heusinger,Christoph Schwarze,2003   **Semantics. Volume 3** Claudia Maienborn,Klaus von Heusinger,Paul Portner,2012-12-19 No detailed description available for SEMANTICS MAIENBORN ET AL BD 33 3 HSK E BOOK   *Semantics - Typology, Diachrony and Processing* Klaus Heusinger,Claudia Maienborn,Paul Portner,2019-02-19 Now available in paperback for the first time since its original publication the material in this book provides a broad accessible guide to semantic typology crosslinguistic semantics and diachronic semantics Coming from a world leading team of authors the book also deals with the concept of meaning in psycholinguistics and neurolinguistics and the understanding of semantics in computer science It is packed with highly cited expert guidance on the key topics in the field making it a bookshelf essential for linguists cognitive scientists philosophers and computer scientists working on natural language

    Events, States and Times Daniel Altshuler,2016-11-07 This monograph investigates the temporal interpretation of narrative discourse in two parts The theme of the first part is narrative progression It begins with a case study of the adverb now and its interaction with the meaning of tense The case study motivates an ontological distinction between events states and times and proposes that now seeks a prominent state that holds throughout the time described by the tense Building on prior research prominence is shown to be influenced by principles of discourse coherence and two coherence principles NARRATION and RESULT are given a formally explicit characterization The key innovation is a new method for testing the definitional adequacy of NARRATION and RESULT namely by an abductive argument This contribution opens a new way of thinking about how eventive and stative descriptions contribute to the perceived narrative progression in a discourse The theme of the second part of the monograph is the semantics and pragmatics of tense A key innovation is that the present and

past tenses are treated as scalar alternatives a view that is motivated by adopting a particular hypothesis concerning stative predication The proposed analysis accounts for tense in both matrix clauses and in complements of propositional attitudes where the notorious double access reading arises This reading is explored as part of a corpus study that provides a glimpse of how tense semantics interacts with Gricean principles and at issueness Several cross linguistic predictions of the analysis are considered including their consequences for the Sequence of Tense phenomenon and the Upper Limit Constraint Finally a hypothesis is provided about how tense meanings compose with temporal adverbs and verb phrases Two influential analysis of viewpoint aspect are then compared in light of the hypothesis The monograph is directed at graduate students and researchers in semantics pragmatics and philosophy of language The analysis of narrative discourse that is developed in the monograph synthesizes and builds on prior collaborative research with Corien Bary Valentine Hacquard Thomas Roberts Roger Schwarzschild Una Stojni K roly Varasdi and Aaron White Daniel Altshuler is an Assistant Professor of Linguistics at the School of Cognitive Science Hampshire College and an Adjunct Professor of Linguistics at the University of Massachusetts Amherst   *The Spanish Perfects* L. Howe,2013-02-27 This book considers the role of cross dialectal data in our understanding of linguistic variability focusing on the widely discussed dichotomy between past tense forms and relying primarily on spoken language data from different varieties of Spanish   <u>From Polysemy to Semantic Change</u> Martine Vanhove,2008 This book is the result of a joint project on lexical and semantic typology which gathered together field linguists semanticists cognitivists typologists and an NLP specialist These cross linguistic studies concern semantic shifts at large both synchronic and diachronic the outcome of polysemy heterosemy or semantic change at the lexical level The first part presents a comprehensive state of the art of a domain typologists have long been reluctant to deal with Part two focuses on theoretical and methodological approaches cognition construction grammar graph theory semantic maps and data bases These studies deal with universals and variation across languages illustrated with numerous examples from different semantic domains and different languages Part three is dedicated to detailed empirical studies of a large sample of languages in a limited set of semantic fields It reveals possible universals of semantic association as well as areal and cultural tendencies   *Language and Space: Theories and methods* Peter Auer,Jürgen Erich Schmidt,2010   **Proceedings of the 4th World Congress of African Linguistics, New Brunswick 2003** Akinbiyi Akinlabi,Oluseye Adesola,2004 Ben Elugbe u Tayo Bankale Cognation Percentages in Benue Congo Implications for Internal Classification Larry Hyman Why Describe African Languages H Ekkehard Wolff Segments and Prosodies in Chadic On Descriptive and Explanatory Adequacy Historical Reconstructions and the Status of Lamang Hdi Oluseye Adesola Coda Deletion in the Yoruba Loan Phonology Akinbiyi Akinlabi u Alexander Iwara Transparency and Opacity in Lokaa Vowel Harmony Michael Cahill Marked Tones and Texture The Necessity of High Tones in K Anni Bruce Connell Pitch Realization of Questions and Statements in Mambila Yoshihito Dobashi Phonological Phrasing in Sandawe Laura J Downing Constraint and Complexity in Subsegmental Representations
