Machine Learning and Its Application: A Quick Guide for Beginners Indranath Chatterjee,2021-12-22 Machine Learning and Its Application A Quick Guide for Beginners aims to cover most of the core topics required for study in machine learning curricula included in university and college courses The textbook introduces readers to central concepts in machine learning and artificial intelligence which include the types of machine learning algorithms and the statistical knowledge required for devising relevant computer algorithms The book also covers advanced topics such as deep learning and feature engineering Key features 8 organized chapters on core concepts of machine learning for learners Accessible text for beginners unfamiliar with complex mathematical concepts Introductory topics are included including supervised learning unsupervised learning reinforcement learning and predictive statistics Advanced topics such as deep learning and feature engineering provide additional information Introduces readers to python programming with examples of code for understanding and practice Includes a summary of the text and a dedicated section for references Machine Learning and Its Application A Quick Guide for Beginners is an essential book for students and learners who want to understand the basics of machine learning and equip themselves with the knowledge to write algorithms for intelligent data processing applications

Machine Learning with Go Quick Start Guide Michael Bironneau,Toby Coleman,2019-05-31 This quick start guide will bring the readers to a basic level of understanding when it comes to the Machine Learning ML development lifecycle will introduce Go ML libraries and then will exemplify common ML methods such as Classification Regression and Clustering Key FeaturesYour handy guide to building machine learning workflows in Go for real world scenariosBuild predictive models using the popular supervised and unsupervised machine learning techniquesLearn all about deployment strategies and take your ML application from prototype to production readyBook Description Machine learning is an essential part of today s data driven world and is extensively used across industries including financial forecasting robotics and web technology This book will teach you how to efficiently develop machine learning applications in Go The book starts with an introduction to

machine learning and its development process explaining the types of problems that it aims to solve and the solutions it offers. It then covers setting up a frictionless Go development environment including running Go interactively with Jupyter notebooks. Finally, common data processing techniques are introduced. The book then teaches the reader about supervised and unsupervised learning techniques through worked examples that include the implementation of evaluation metrics. These worked examples make use of the prominent open source libraries GoML and GONUM. The book also teaches readers how to load a pre-trained model and use it to make predictions. It then moves on to the operational side of running machine learning applications, deployment, Continuous Integration, and helpful advice for effective logging and monitoring. At the end of the book, readers will learn how to set up a machine learning project for success, formulating realistic success criteria and accurately translating business requirements into technical ones.

What you will learn:

- Understand the types of problem that machine learning solves and the various approaches.
- Import pre-processed and explore data with Go to make it ready for machine learning algorithms.
- Visualize data with GONUM plot and GopherNotes.
- Diagnose common machine learning problems such as overfitting and underfitting.
- Implement supervised and unsupervised learning algorithms using Go libraries.
- Build a simple web service around a model and use it to make predictions.

Who this book is for: This book is for developers and data scientists with at least beginner-level knowledge of Go and a vague idea of what types of problem Machine Learning aims to tackle. No advanced knowledge of Go and no theoretical understanding of the math that underpins Machine Learning is required.
