

TEXTUAL ANALYSIS

Textual analysis is a method used to interpret and understand written or spoken language to gain an understanding of meanings produced through text.

OVERVIEW

Textual analysis involves examining the structure, content, and context of a text to uncover its underlying meanings, themes, and patterns. This process typically involves identifying key ideas, analyzing the rhetorical strategies employed, and considering the cultural, historical, and social factors that may have influenced the text's creation.

EXAMPLE

- **Analysis of policy documents:** A scholar could analyze the policy documents of public companies to determine the evolving ways in which they approach, define, and prioritize Environmental and Social Responsibility as a key value of the companies. This could involve methods like thematic coding and word frequency analysis.

Introducing Electronic Text Analysis is a practical and much needed introduction to corpora bodies of linguistic data. Written specifically for students studying this topic for the first time the book begins with a discussion of the underlying principles of electronic text analysis. It then examines how these corpora enhance our understanding of literary and non literary works. In the first section the author introduces the concepts of concordance and lexical frequency concepts which are then applied to a range of areas of language study. Key areas examined are the use of on line corpora to complement traditional stylistic analysis and the ways in which methods such as concordance and frequency counts can reveal a particular ideology within a text. Presenting an accessible and thorough understanding of the underlying principles of electronic text analysis the book contains abundant illustrative examples and a glossary with definitions of main concepts. It will also be supported by a companion website with links to on line corpora so that students can apply their knowledge to further study. Reading Media Jonathan Gray, *Journal of Popular Communication* Jonathan Gray, Daphne Gershon, 2026-02-03

Innovative methods in textual analysis to decode today's ever-expanding media landscape

Reading Media How to do Textual Analysis reinvigorates one of media and cultural studies' most foundational methods at a moment when it is most needed, showing its continuing vitality by adapting it to new media environments, cultural objects, and scholarly questions. The volume insists that the close study of meaning, form, and representation remains central to understanding media's power. With contributions from leading and emerging scholars, the book offers a diverse toolkit from narratological and semiotic analysis of film and TV to historical poetic accounts of TikTok, multimodal analysis of Afrobeats music videos, and postcolonial criticism of games. Essays extend the scope of textual analysis to unexpected objects such as plastic waste, memes, and refugee-authored media, while others demonstrate how texts operate across platforms, genres, and transmedia franchises. Beyond offering new and improved approaches to textual analysis, each chapter illustrates its approach using a specific case study, functioning both as a step-by-step how-to guide and as an example of textual analysis in action.

Reading Media advances a vision of textual analysis that is rigorous yet flexible, attuned to both aesthetics and politics, and responsive to today's media environment. Essential for students and scholars in media communication and cultural studies, *Reading Media* both reaffirms and renews textual analysis as an indispensable way of engaging with the mediated worlds that shape contemporary life.
