Temporalization Of Time

Jacques Derrida

Temporalization Of Time:

The Temporalization of Time Mike Sandbothe, 2001-10-31 The subject of time is currently experiencing a revival in the most diverse areas of academic discourse Contemporary time theory attempts to relate theoretical time concepts both to one another and to everyday experience of time This book deals with the philosopher Martin Heidegger and the chemist physicist Ilya Prigogine Nobel Prize for Chemistry 1977 two prominent advocates of pioneering time concepts in the 20th century The author not only provides a transdisciplinary introduction to modern debate on the problem of time but suggests how the basic tendencies in this debate might be pragmatically interlinked with each other *Derrida and the Political* Richard Beardsworth, 2013-04-15 Jacques Derrida one of the most influential controversial and complex thinkers of our time has come to be at the centre of many political debates This is the first book to consider the political implications of Derrida's deconstruction It is a timely response both to Derrida's own recent shift towards thinking about the political and to the political focus of contemporary Continental philosophy Richard Beardsworth's study *Derrida and the Political* locates a way of thinking about deconstruction using the tools of political philosophy Richard Beardsworth has provided students of philosophy politics and critical theory with a thought provoking upper level introduction to Derrida a work as a political theorist *The New Yearbook for Phenomenology and Phenomenological Philosophy* Burt Hopkins, John Drummond, 2015-03-24 *The New Yearbook for Phenomenology and Phenomenological Philosophy* provides an annual international forum for phenomenological research in the spirit of Husserl's groundbreaking work and the extension of this work by such figures as Scheler Heidegger Sartre Levinas Merleau Ponty and Gadamer *Unphenomenal Shakespeare* Julián Jiménez Heffernan, 2023-01-16 In the aftermath of New Historicism and Cultural Materialism the field of Shakespeare Studies has been increasingly overrun by post theoretical phenomenological claims Many of the critical tendencies that hold the field today post humanism speculative realism ecocriticism historical phenomenology new materialism performance studies animal studies affect studies are consciously or unwittingly informed by phenomenological assumptions This book aims at uncovering and examining these claims not only to assess their philosophical congruency but also to determine their hermeneutic relevance when applied to Shakespeare More specifically *Unphenomenal Shakespeare* deploys resources of speculative critique to resist the moralistic and aestheticist phenomenalization of the Shakespeare playtexts across a variety of schools and scholars a tendency best epitomized in Bruce Smith's *Phenomenal Shakespeare* 2010 *Husserl's Account of Our Consciousness of Time* James R. Mensch, 2010 Having asked What then is time Augustine admitted I know well enough what it is provided that nobody asks me but if I am asked what it is and try to explain I am baffled We all have a sense of time but the description and explanation of it remain remarkably elusive Through a series of detailed descriptions Husserl attempted to clarify this sense of time This book traces the development of his account of our temporal self awareness starting with his early 1905 1909 lectures on time consciousness and proceeding through the 1917 18 Bernau Manuscripts

the Analyses of Passive Syntheses of the 1920s and ending with the C B and E manuscripts on time and instincts of the 1930s Although it covers all the stages of Husserl's account of temporality the book is nonetheless systematic in its approach It is organized about a number of basic topics in the theory of time and presents and critically appraises Husserl's positions on the issues pertaining to each

The Sound Studies Reader Jonathan Sterne, 2012-11-12 The Sound Studies Reader blends recent work that self-consciously describes itself as sound studies along with earlier and lesser-known scholarship on sound from across the humanities and social sciences The Sound Studies Reader touches on key themes like noise and silence architecture acoustics and space media and reproducibility listening voices and disability culture community power and difference and shifts in the form and meaning of sound across cultures contexts and centuries Writers reflect on crucial historical moments difficult definitions and competing accounts of the role of sound in culture and everyday life Across the essays readers will gain a sense of the range and history of key debates and discussions in sound studies The collection begins with an introduction to welcome novice readers to the field and acquaint them with the main issues in sound studies Individual section introductions give readers further background on the essays and an extensive up-to-date bibliography for further reading in sound studies make this an original and accessible guide to the field Contributors Rick Altman Jacques Attali Roland Barthes Jody Berland Karin Bijsterveld Barry Blesser Georgina Born Michael Bull Adriana Cavarero Michel Chion Kate Crawford Richard Cullen Rath Jacques Derrida Mladen Dolar John Durham Peters Kodwo Eshun Frantz Fanon Lisa Gitelman Gerard Goggin Steve Goodman Stefan Helmreich Michelle Hilmes Charles Hirschkind Shuhei Hosokawa Don Ihde Douglas Kahn Friedrich Kittler Brandon LaBelle James Lastra Richard Leppert Michelle Martin Louise Meintjes Mara Mills John Mowitt R Murray Schafer Ana María Ochoa Gautier John Picker Benjamin Piekut Trevor Pinch Tara Rodgers Linda Ruth Salter Jacob Smith Jason Stanyek Jonathan Sterne Emily Thompson Frank Trocco Michael Veal Alexander Weheliye

The History of Continental Philosophy Alan D. Schrift, 2011-01-01 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight-volume History of Continental Philosophy will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant's philosophy and its initial reception the History traces the evolution of continental philosophy through major figures as well as movements such as

existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism globalization and the environment Throughout the volumes examine important philosophical figures and developments in their historical political and cultural contexts The first reference of its kind A History of Continental Philosophy has been written and edited by internationally recognized experts with a commitment to explaining complex thinkers texts and movements in rigorous yet jargon free essays suitable for both undergraduates and seasoned specialists These volumes also elucidate ongoing debates about the nature of continental and analytic philosophy surveying the distinctive sometimes overlapping characteristics and approaches of each tradition Featuring helpful overviews of major topics and plotting road maps to their underlying contexts A History of Continental Philosophy is destined to be the resource of first and last resort for students and scholars alike
