

Modules (VB ONLY) (optional)

- So what is a `Module`?
- It is a VB .NET abstraction – a *convenience* for programmers used to programming in other languages such as C++, Visual Basic Version 6
 - Does not extend to other languages
 - Code written in other languages but combined with VB .NET code see a `Module` only a class with shared data and methods
 - Not even part of the Core Type System
- The VB compiler takes a `Module` that you write, and treats it as a special class
- `Modules` are non-creatable (cannot be instantiated)
 - `Modules` cannot have constructors
- `Modules` do not support inheritance
