*Logistics 4.0* Turan Paksoy, Cigdem Gonul Kochan, Sadia Samar Ali, 2020-12-17 Industrial revolutions have impacted both manufacturing and service From the steam engine to digital automated production the industrial revolutions have conducted significant changes in operations and supply chain management SCM processes Swift changes in manufacturing and service systems have led to phenomenal improvements in productivity The fast paced environment brings new challenges and opportunities for the companies that are associated with the adaptation to the new concepts such as Internet of Things IoT and Cyber Physical Systems artificial intelligence AI robotics cyber security data analytics block chain and cloud technology These emerging technologies facilitated and expedited the birth of Logistics 4 0 Industrial Revolution 4 0 initiatives in SCM has attracted stakeholders attentions due to its ability to empower using a set of technologies together that helps to execute more efficient production and distribution systems This initiative has been called Logistics 4 0 of the fourth Industrial Revolution in SCM due to its high potential Connecting entities machines physical items and enterprise resources to each other by using sensors devices and the internet along the supply chains are the main attributes of Logistics 4 0 IoT enables customers to make more suitable and valuable decisions due to the data driven structure of the Industry 4 0 paradigm Besides that the system s ability of gathering and analyzing information about the environment at any given time and adapting itself to the rapid changes add significant value to the SCM processes In this

peer reviewed book experts from all over the world in the field present a conceptual framework for Logistics 4.0 and provide examples for usage of Industry 4.0 tools in SCM This book is a work that will be beneficial for both practitioners and students and academicians as it covers the theoretical framework on the one hand and includes examples of practice and real world

Gender Gap in Blockchain Systems Amanda Van Annan, 2025-10-14 Master's Thesis from the year 2024 in the subject Computer Science Internet New Technologies grade 1.5 course MBA language English abstract Blockchain focuses on using digital systems to execute and record online transactions that can only be perceived or considered as the building blocks developed from digital algorithms and secured through cryptography This technology system is one of the key strategic technology trends used in various organizations or public sectors to record transactions The problem at hand is the gender gap within the blockchain industry where African American women are underrepresented and face various challenges in their pursuit of opportunities and advancement Despite the increasing interest in blockchain technology the participation of women in the industry remains significantly lower compared to their male counterparts This gender disparity not only limits the diversity of talent and ideas within the industry but also hinders the industry's overall growth innovation and potential for positive social impact Existing studies on gender gaps in technology fields while valuable often provide a limited understanding of the specific dynamics and challenges within the blockchain industry There is a need for focused research that examines the gender gap in blockchain systems and investigates the unique factors that contribute to women's underrepresentation This study aims to fill this gap by investigating the gender gap in blockchain systems focusing on African American women's perspectives and their involvement in blockchain technology By addressing this research gap we can gain insights into the barriers African American women face in the industry and identify strategies to foster a more inclusive and equitable blockchain ecosystem The general research question is What are the potential factors that lead to the gender gap in blockchain systems among African American women in the US who are influencers in the blockchain space The sub research questions are How does race influence gender inequality in blockchain technology change among African American women in the US How do trust and transparency influence the leadership position of African American women in the blockchain system What are the key strategies or success factors to promote future gendered leadership in blockchain systems

The Engineering Index Annual, 1992 Since its creation in 1884 Engineering Index has covered virtually every major engineering innovation from around the world It serves as the historical record of virtually every major engineering innovation of the 20th century Recent content is a vital resource for current awareness new production information technological forecasting and competitive intelligence The world's most comprehensive interdisciplinary engineering database Engineering Index contains over 10.7 million records Each year over 500,000 new abstracts are added from over 5,000 scholarly journals trade magazines and conference proceedings Coverage spans over 175 engineering disciplines from over 80 countries Updated weekly
