Spring Peepers are Calling Charlene W. Billings,1978-01-01 Discusses the life cycle of the spring peeper and the capture and care of this tiny tree frog as a pet

The Ecology and Behavior of Amphibians Kentwood D. Wells,2010-02-15 Consisting of more than six thousand species amphibians are more diverse than mammals and are found on every continent save Antarctica Despite the abundance and diversity of these animals many aspects of the biology of amphibians remain unstudied or misunderstood The Ecology and Behavior of Amphibians aims to fill this gap in the literature on this remarkable taxon It is a celebration of the diversity of amphibian life and the ecological and behavioral adaptations that have made it a successful component of terrestrial and aquatic ecosystems Synthesizing seventy years of research on amphibian biology Kentwood D Wells addresses all major areas of inquiry including phylogeny classification and morphology aspects of physiological ecology such as water and temperature relations respiration metabolism and energetics movements and orientation communication and social behavior reproduction and parental care ecology and behavior of amphibian larvae and ecological aspects of metamorphosis ecological impact of predation on amphibian populations and antipredator defenses and aspects of amphibian community ecology With an eye towards modern concerns The Ecology and Behavior of Amphibians concludes with a chapter devoted to amphibian conservation An unprecedented scholarly contribution to amphibian biology this book is eagerly anticipated among specialists

Amphibians and Reptiles of Georgia John B. Jensen,2008 Featuring more than 475 full color photographs and 182 maps this comprehensive guide to the state s diverse herpetofauna makes accessible a wealth of information about 170 species of frogs salamanders crocodilians lizards snakes and turtles including species attributes behavior life cycles habitat and more

Transport Processes in Nature Hardback with CD-ROM William A. Reiners,Kenneth L. Driese,2004-07-08 A conceptual framework for the study and understanding of the propagation of ecological influences in nature

Transport Processes in Nature PB with CD-ROM William A. Reiners,Kenneth L. Driese,2004-07-08 William Reiners and Kenneth Driese introduce a conceptual framework for studying the propagation of ecological influences across landscapes They also provide examples of models that describe and predict propagation Their volume is an excellent graduate level introduction to the field of landscape ecology which is concerned with the effects of spatial patterns on ecological processes especially the movement of organisms abiotic materials and energy across landscapes

Amphibians and Reptiles of the Great Lakes Region, Revised Ed. James H. Harding,David A Mifsud,2017-05-19 A revised and updated guide to reptiles and amphibians in the Great Lakes region

Ecoacoustics Almo Farina,Stuart H. Gage,2017-07-24 The sounds produced by geophonic biophonic and technophonic sources are relevant to the function of natural and human modified ecosystems Passive recording is one of the most non invasive technologies as its use avoids human intrusion during acoustic surveys and facilitates the accumulation of huge amounts of acoustical data For the first time this book collates and reviews the science behind ecoacoustics illustrating the principles methods and

applications of this exciting new field Topics covered in this comprehensive volume include the assessment of biodiversity based on sounds emanating from a variety of environments the best technologies and methods necessary to investigate environmental sounds implications for climate change and urban systems the relationship between landscape ecology and ecoacoustics the conservation of soundscapes and the social value of ecoacoustics areas of potential future research An invaluable resource for scholars researchers and students Ecoacoustics The Ecological Role of Sounds provides an unrivalled set of ideas tools and references based on the current state of the field

Status and Conservation of Midwestern Amphibians Michael J. Lannoo, 1998 In 1990 an international group of biologists meeting to discuss rumors of declines in the number of amphibians discovered that amphibian disappearances once thought to be a local problem were not the problem was global And even more disturbing amphibians were disappearing not just from areas settled by humans but from regions of the world once believed to be pristine Under the mantle of the Declining Amphibian Populations Task Force this timely book addresses three fundamental questions for the midwestern United States are amphibians declining if so why and if so what can be done to halt these losses In the Midwest defined here as Missouri Iowa Illinois Indiana Ohio Minnesota Wisconsin and Michigan there can be no doubt that the number of salamanders and frogs has declined with Euro American settlement and the conversion to an agriculturally dominated landscape Habitat loss and landscape fragmentation have been major factors in this decline as have aquacultural uses of natural wetlands Bullfrog introductions have eliminated populations of native amphibians and collecting for the biological supply trade has reduced the number of individuals within many populations The goal of the forty two essays in this well documented well illustrated book is to put between two covers all we know now about the status of midwestern amphibians By doing this the editor has created a readily accessible historical record for future studies Organized into sections covering landscape patterns and biogeography species status regional and state status diseases and toxins conservation and monitoring and applications this landmark volume will serve as the foundation for amphibian conservation in the Midwest

these processes are influenced by the animal's physiological state. The contributors also discuss male-to-male call strategies as well as how female preferences for call variation contribute to sexual selection, speciation, and hybridization. The text presents material about kin recognition abilities and the surprising range of visual displays by tropical anurans and examines how the inherent structure of the auditory system might generate sensory biases that influence signal evolution. *The Canadian Field-naturalist*, 1964 **The Journal of the Iowa Academy of Science**, 2000
