The Disappearing Patient Margaret Drake, 2004-08-31 A southern occupational therapist works with a difficult patient who disappears. She grapples with ties of home versus the draw of adventure and decides it is time to leave her hometown job and take a position in southern Alaska. Getting there is an adventure she shares with her mother and her cat. Traveling with a cat is always a challenge. The lifestyle in Ketchikan differs dramatically from small town South. The weather, the water, travel, the small aircraft, travel and Revillagigedo Island all provide new challenges. She meets an interesting man and supportive colleagues. The difficult patient reappears and complicates her life. She outwits him when he threatens her very existence. It turns out to have been a good job move and cultural adjustment.

The Vanishing Patient Mairi Chong, 2022-08-03 A doctor begins to doubt her own sanity as she investigates a patient's wild claims in this new mystery from the author of *Lethal Resuscitation*. Dr. Cathy Moreland is taken aback when an irate patient comes to her practice claiming his ailing wife has been kidnapped by one of her colleagues using a false name. Is someone impersonating a doctor or is Adam Steer delusional? After looking into Adam's claims, she feels reassured that no such thing actually happened but continues to worry that Steer is mentally unwell. A visit to his home only leads to more alarm. No one answers the door but Cathy overhears a conversation that convinces her something sinister is going on and that she herself may be in danger. Cathy's own bipolar disorder is well managed but she's beginning to doubt her own sanity and others are too. As strange developments unfold, will she be able to make any sense of the events around her before everything spirals out of control?

Body-Mind Dissociation in Psychoanalysis Riccardo Lombardi, 2016-11-25 The conflict and dissociation between the Body and the Mind have determinant implications in the context of our current clinical practice and are an important source of internal and relational disturbances. Body-Mind Dissociation in Psychoanalysis proposes the concept as a new hypothesis different from traumatic dissociation or states of splitting. This approach opens the door to a clinical confrontation with extreme forms of mental disturbance such as psychosis or borderline disorders and strengthens the relational power of the analytic encounter through a focus on the internal sensory-emotional axis in both analyst and analysand. The book details the importance of the analyst's intrasubjective relationship with the analysand in constructing new developmental horizons starting from the body-mind.
