Handbook of Orthography and Literacy R. Malatesha Joshi, P.G. Aaron, 2013-05-13 Until about two decades ago the study of writing systems and their relationship to literacy acquisition was sparse and generally modeled after studies of English language learners This situation is now changing As the worldwide demand for literacy continues to grow researchers from different countries with different language backgrounds have begun examining the connection between their writing systems and literacy acquisition This text which derives from a NATO sponsored conference on orthography and literacy brings together the research of 70 scholars from across the world the largest assemblage of such experts to date Their findings are grouped into three parts as follows Part I Literacy Acquisition in Different Writing Systems describes the relationship between orthography and literacy in twenty five orthographic systems This section serves as a handy reference source for understanding the orthographies of languages as diverse as Arabic Chinese English Icelandic Kannada and Kishwahili Part II Literacy Acquisition From a Cross Linguistic Perspective makes direct comparisons of literacy acquisition in English and other orthographic systems The overall conclusion that emerges from these eight chapters is that the depth of an orthographic system does influence literacy acquisition primarily by slowing down the acquisition of reading skills Even so studies show that dyslexic readers can be found across all orthographic systems whether shallow or deep which shows that dyslexia also has internal cognitive and biological components Part III Literacy Acquisition Instructional Perspectives explores literacy acquisition from developmental and instructional perspectives and ends with a look into the future of literacy research This Handbook is appropriate for scholars researchers and graduate students in such diverse fields as cognitive psychology psycholinguistics literacy education English as a second language and communication disorders

The Use of Signed English in Sight Word Instruction with Elementary English Language Learners Kari Lynn Wiltse, 2009 The purpose of this study is to determine whether or not Signed English is an effective strategy for the teaching and learning of high frequency sight words for elementary English language learners ELLs Using the instructional framework put forth by Carney Cioffi Raymond this pre experimental research study utilized pre and posttests to measure the acquisition of 23 high frequency words taught to six 2nd grade English language learners over a six week period An additional week of more conventional sight word instruction was also conducted to compare the rate of acquisition of words learned through the Signed English strategy with the number of words students learned using more traditional types of instruction The results indicate that the use of Signed English seems to be an effective and engaging strategy for sight word learning for English language learners

Special Educational Needs in the Primary School Jean Gross, 2002 Reviews of the first two editions extraordinarily rich in ideas an essential buy TES an excellent clearly written work which is full of practical advice and presented in an easily readable manner This book is a highly recommended read Do buy it and see Support for Learning has proved especially influential at practitioner level never failing to offer a balanced assessment British Journal of Special Education I have a comprehensive library of books on special educational needs but I use this one more than any other because I find it readable practical and accessible It is a useful and informative book both to read cover to cover and to dip into Although it is based on sound theoretical knowledge it is clear that Jean Gross is writing from her own experience as a teacher and SEN practitioner TES Recent legislation and cutbacks to central support services mean that the responsibility for meeting special educational needs is resting ever more squarely on the shoulders of ordinary classroom teachers Yet few feel wholly confident in their ability to adapt work within the national curriculum to meet the whole range of needs or coordinate successful individual education plans for children who for whatever reason are not learning as well as they might This book will increase that confidence Aimed at busy class teachers special needs coordinators heads and teachers in training it shows how the teacher can build differentiation into planning lessons and schemes of work It describes

workable strategies for managing the most common behaviour difficulties and meeting special needs in language literacy and mathematics At a whole school level it offers practical guidance on reviewing special needs policies assessment record keeping and the management of roles and resources The focus is on the way in which schools can do a good job in meeting special needs themselves within the everyday constraints of time money and energy and in so doing provide genuinely inclusive opportunities for all children This edition has been comprehensively updated and rewritten to cover the revised SEN Code of Practice and related legislation new directions in inclusion and all the major curriculum initiatives now in place in primary schools
