Time Sharing Computer Systems:

Time-sharing Computer Systems Maurice Vincent Wilkes,1972   An Analysis of Time-shared Computer Systems Allan L. Scherr,1965 Some of the aspects of the operation of time shared interactive computer systems are analyzed The emphasis is on the reaction of hardware systems to the demands that its users make upon it Simply stated the problem is to characterize both time shared systems and their users in order to be able to predict the performance of the two operating together Portions of this problem include the specification and measurement of user characteristics the development and verification of both simulation and mathematical models for time shared systems and the specification and measurement of performance matrics for such systems The user and some of the performance measurements were made on Project MAC s Compatible Time Sharing System CTSS Author   Time-sharing Systems Gordon M. Bull,S. F. G. Packham,1971   **Use of a Time-shared Computer System to Control a Hall Effect Experiment** W. Murray Bullis,United States. National Bureau of Standards,1969 An experimental time shared computer system has been used to control and collect data from a Hall effect experiment In addition to selection of the voltage sequence and control of specimen current and magnetic flux directions the computer exerts positive control over the specimen temperature in accordance with a series of thermocouple voltages entered by the operator at the beginning of the run The interface circuitry is constructed from four general purpose modules and a single special purpose unit Details of the interface system and the programs used to control the experiment and to perform intermediate calculations are given It was found that the time shared system was well suited to control an experiment of this type The demands on the computer were essentially similar to those required by a human user interacting in a conversational mode Substantial savings in time over manual data collection and reduction were realized a temperature run with 38 to 40 data points between 10 and 320 K could be completed in less than 4 hours   **On-line Computing: Time-shared Man-computer Systems** Walter J. Karplus,1967   **Developing Specifications for a Low-cost Computer System for Secondary Schools** George Kleiner,1972   *On-line Computing: Time-shared Man-computer Systems* Walter J. Karplus,1967   **NBS Special Publication** ,1968   **Annotated Bibliography of the Literature on Resource Sharing Computer Networks** Helen M. Wood,Shirley Ward Watkins,Ira W. Cotton,1976   *Computer Literature Bibliography: 1964-1967* W. W. Youden,1965   *Annotated Bibliography of the Literature on Resource Sharing Computer Networks* Robert P. Blanc,1973   Electronics World ,1970   **Time-sharing Computer Systems** M. V. Wilkes,1979   **CIPS Computer Magazine** Canadian Information Processing Society,1973   U.S. Government Research & Development Reports ,1970   **Time-sharing's 'BASIC' Language** General Electric Company,1968   Absentee Computations in a Multiple-access Computer System Harvey M. Deitel,1968 In multiple access computer systems emphasis is placed upon servicing several interactive users simultaneously However many computations do not require user interaction and the user may therefore want to run these computations absentee or user not present A mechanism is presented which provides for the

handling of absentee computations in a multiple access computer system The design is intended to be implementation independent Some novel features of the system s design are a user can switch computations from interactive to absentee and vice versa the system can temporarily suspend and then continue absentee computations to aid in maintaining an efficient absentee interactive workload on the system system administrative personnel can apportion system resources between interactive and absentee computations in order to place emphasis upon a particular mode during certain periods of operation and the system s multiple computation stream facility allows the user to attach priorities to his absentee computations by placing the computations in either low standard or high priority streams Author   Notes on Human Engineering Concepts and Theory University of Michigan. Engineering Summer Conferences,1966   **Naval Research Logistics Quarterly** ,1969   **Advances in Instrumentation** ,1965
