Web Content Management A Collaborative Approach:

Content Management for E-Learning Núria Ferran Ferrer, Julià Minguillón Alfonso, 2010-10-17 The increasing growth in the use of e learning environments in which education is delivered and supported through information and communication technologies has brought new challenges to academic institutions From all the current definitions of e learning it can be seen that learning contents are one of the key issues for a successful e learning experience Therefore there is a real need for academic staff managers and librarians to re think the whole process of delivering courses information resources and information services The book focuses on defining content management and its relationship with knowledge management providing perspectives on how the semantic web could complement content management how to deal with copyright restrictions and how to describe information competencies and skills required and acquired by teachers and students in virtual environments Offered is a design project for managing digital content for classical and distance education institutions covering all the aspects related to the content lifecycle integrating it into the learning process Practical aspects such as standards for content e learning management a review of existing experiences of learning repositories and a survey of available platforms for delivering courses and providing access to information resources is also covered Lastly the book addresses the three main factors which make it crucial in the current context first the web 2 0 paradigm which breaks the content producer consumer barrier second the open content movement for educational purposes which changes the knowledge management transference model and third the new European Higher Education Area where the concept of content needs to be rethought

Integrative Document & Content Management Len Asprey, Michael Middleton, 2003-01-01 Portals present unique strategic challenges in the academic environment Their conceptualization and design requires the input of campus constituents who seldom interact and whose interests are often opposite The implementation of a portal requires a coordination of applications and databases controlled by different campus units at a level that may never before have been attempted at the institution Building a portal is as much about constructing intra campus bridges as it is about user interfaces and content Designing Portals Opportunities and Challenges discusses the current status of portals in higher education by providing insight into the role portals play in an institution s business and educational strategy by taking the reader through the processes of conceptualization design and implementation of the portals in different stages of development at major universities and by offering insight from three producers of portal software systems in use at institutions of higher learning and elsewhere

Content Management Systems Nelson Oly Ndubisi, 2006 Libraries have only just begun to realize that their web presence is potentially as rich and complex as their online catalogs and that it needs an equal amount of management to keep it under control Content management systems covers a range of topics from implementation to interoperability object oriented database management systems and research about meeting user needs
