The Zero Trap Paula Gosling, 1979 Annual Report Guam Agricultural Experiment Station, 1992 **Brookhaven Symposia in Biology** Brookhaven National Laboratory, 1948 Includes bibliographies **Liquidity Traps with Global Taylor Rules** Stephanie Schmitt-Grohé, Martin Uribe, 2001 **Non-Equilibrium Reacting Gas Flows** Ekaterina Nagnibeda, Elena Kustova, 2009-07-09 In the present monograph we develop the kinetic theory of transport phenomena and relaxation processes in the flows of reacting gas mixtures and discuss its applications to strongly non equilibrium conditions The main attention is focused on the influence of non equilibrium kinetics on gas dynamics and transport properties Closed systems of fluid dynamic equations are derived from the kinetic equations in different approaches We consider the most accurate approach taking into account the state to state kinetics in a flow as well as simplified multi temperature and one temperature models based on quasi stationary distributions Within these approaches we propose the algorithms for the calculation of the transport coefficients and rate coefficients of chemical reactions and energy exchanges in non equilibrium flows the developed techniques are based on the fundamental kinetic theory principles The theory is applied to the modeling of non equilibrium flows behind strong shock waves in the boundary layer and in nozzles The comparison of the results obtained within the frame of different approaches is presented the advantages of the new state to state kinetic model are discussed and the limits of validity for simplified models are established The book can be interesting for scientists and graduate students working on physical gas dynamics aerothermodynamics heat and mass transfer non equilibrium physical chemical kinetics and kinetic theory of gases **Advances in Atomic, Molecular, and Optical Physics** Benjamin Bederson, Herbert Walther, 2002-12-09 This series established in 1965 is concerned with recent developments in the general area of atomic molecular and optical physics The field is in a state of rapid growth as new experimental and theoretical techniques are used on many old and new problems Topics covered include related applied areas such as atmospheric science astrophysics surface physics and laser physics Articles are written by distinguished experts who are active in their research fields The articles contain both relevant review material and detailed descriptions of important recent developments **The Plumbers Trade Journal**, 1899 **Growing Up Green** William B.
