Theoretical Principles Of Distance Education:

Theoretical Principles of Distance Education Desmond Keegan, 2005-08-15 According to UNESCO statistics 10 million of the world's 600 million students study at a distance. Theoretical Principles of Distance Education seeks to lay solid foundations for the education of these students and for the structures within which they study. As a more industrialised form of education provision, distance education is well adapted to the use of new communication technologies and brings to education many of the strengths and dangers of post industrialism. The central focus of the study of distance education is the placing of the student at home or at work and the justification of the abandonment in this form of education of interpersonal face to face communication previously considered to be a cultural imperative for education in both east and west. This book explores the problems that distance education poses to the theorist bringing together an international team of distance educators to address these issues for the first time in a systematic way. The team comprises theoreticians, administrators, experts in educational technology and adult education, experts in learning from video machines, from computers and other forms of technology. Contributions from Italy and Scandinavia contrast with viewpoints provided by scholars from the US, Canada, Australia and the UK.

Theory and Practice of Distance Education Borje Holmberg, 2005-07-25 This text provides a comprehensive global survey of distance education, discussing the place distance education holds in educational thought, its theories, principles, presentation techniques, its organization and administration.

Challenge Distance Learning Klaus Zierer, 2020-08-16 The corona pandemic has led to major interventions by society as a whole worldwide which also affect the education system. In order to prevent an uncontrolled spread, i.e. overburdening the health system, schools were closed and students were sent to distance learning. That this measure was a challenge was obvious from the outset because it was new and unprepared for all those involved. In this respect, an educational approach to distance learning is more important than ever, especially since it is not foreseeable when normal operation in the educational system will be possible again. This book presents both theoretical principles and empirical results on distance learning with the aim of providing teachers with assistance so that the corona crisis can also be pedagogically mastered.

The McGraw-Hill Handbook of Distance Learning Alan G. Chute, Melody M. Thompson, Burton W. Hancock, 1999 This comprehensive guide addresses the needs and concerns of HR and training managers who want to help their organizations implement distance learning programs but don't know where to start. The Handbook offers practical advice to help get your organization started in distance learning or improve your existing distance learning program. Topics covered include how to apply distance learning to new product and policy information, job skills training, retraining, advanced professional education, management development courses, and customer education.

South African Journal of Library and Information Science, 1994 *Four Decades of Distance Education in India* Suresh Garg, 2006 The evolution of distance education in India in forms of dual mode, single mode, and consortia has been phenomenal. The system today is one of the largest distance education networks in the world, comprising dual mode

university distance education institutes single mode open universities dual mode secondary education single mode open schools distance education council consortium and many private and semi government providers of education and training The four generations of distance education have been implemented in a variety of forms and models and the system exhibits adoption of innovative practices in course design development delivery evaluation media networking and planning and management which have proved effective in addressing the issues of access and equity economy quality and reform in the country and which have been adapted emulated by a host of such systems in the developing world It is therefore imperative at this stage to reflect on the developments of above four decades of distance education in this country and map its future expansion Each chapter in the volume reflects on the concerned theme covering the distance education system in the country traces the limitations and adoption of innovative strategies to address the issues and introspect on its future possibilities
