The Zoo:

The Zoo Isobel Charman,2016-11-03 How one man's mad mission became one of the best loved places in the world The creation of a zoo in Dickensian London when only one other existed across the world is a story of jaw dropping audacity It is the story of trailblazing scientists rival zookeepers and aristocratic naturalists collecting amazing animals from all four corners of the globe It is the story of a weird and wonderful oasis in the heart of a swirling city and of incredible characters both human and animal from Stamford Raffles and Charles Darwin to Jenny the orang utan and Obaysch the celebrity hippo the first that anyone in Britain had ever seen Against a background of global Empire domestic reform and industrialisation this is a new history of a new world [Encyclopedia of the World's Zoos](#) Catharine E. Acampora,2010-06-14 *Metamorphoses of the Zoo* Animal Encounter After Noah is a volume dedicated to radically transformative approaches to spaces set aside as zoological parks or gardens Historically these establishments served as symbols of power and venues for entertainment but today they have taken to portraying themselves as flagships of environmental education scientific research and wildlife conservation Along with the past century's turn in exhibition design toward increasingly naturalistic architecture such portrayals have been received by many in an uncritically positive light At the same time it remains clear that zoos are immensely popular attractions drawing hundreds of millions of visitors globally per year This level of participation is consistent with the suggestion that humans harbor a strong sense of biophilia one which moves them to seek out diverse life forms when their own territories become too biologically homogenous from such a vantage it is no accident that zoos are most often situated in urbanizing areas *Metamorphoses of the Zoo* emphasizes creative and reconstructive analyses of zoos that do not simply advocate marginal reform or quick abolition By focusing on

issues such as interspecies progress and eco psychological health this unique collection will satisfy those in disciplines ranging from ecophilosophy to humanistic psychology to environmental studies
