*Artificial Intelligence in Peace, Justice, and Strong Institutions* Kaunert, Christian, Raghav, Anjali, Ravesangar, Kamalesh, Singh, Bhupinder, Riswandi, Budi Agus, 2025-02-28 Artificial intelligence AI plays a transformative role in advancing peace justice and strong institutions by providing innovative solutions to complex societal challenges In areas like conflict resolution legal systems and governance AI enhances decision making improves efficiency and increases transparency AI-powered tools assist in monitoring human rights abuses predicting conflict zones and ensuring fair and unbiased legal processes through automated analysis of case law It can help strengthen institutions by improving public service delivery combating corruption and fostering greater civic participation As nations strive to meet the United Nations Sustainable Development Goal SDG 16 further research into AI's ability becomes key to building just peaceful and inclusive societies *Artificial Intelligence in Peace Justice and Strong Institutions* explores the intersection between AI and sustainable development goals examining how new technologies may help address challenges in governance and law It applies a human rights perspective to AI for fair balanced resilient and peaceful sustainable societies This book covers topics such as e-commerce gender equality and judicial systems and is a useful resource for business owners government professionals policymakers sociologists academicians and researchers

**Handbook of Nondestructive Evaluation 4.0** Norbert Meyendorf, Nathan Ida, Ripudaman (Ripi) Singh, Johannes Vrana, 2025-06-29 This handbook now as second edition continues to comprehensively cover the cutting edge trends and techniques essential for the integration of nondestructive evaluation NDE into the changing face of the modern industrial landscape In particular it delves into the marriage of NDE

with new techniques in e.g. data mining and management, cloud computing, autonomous operation, AI for data analysis and decision making, as well as cyber security, highlighting the potential for cyber-physical controlled production and discussing the myriad possible applications across many different industries. The Handbook of NDE 4.0 centers around the Industry 4.0 philosophy, the next generation of industrial production encompassing all aspects of networking across all industrial areas. It discusses the adaptation of existing NDE techniques to emerging new technological areas such as 3D printing via the introduction of cyber systems into the inspection and maintenance processes. In addition, the handbook covers topics such as the management and processing of big data with respect to real-time monitoring of structural integrity and reliable inspection of individual components. Remote NDE to include competence not available on-site will be a potential technique to increase reliability of NDE inspections by integrating additional specialist inputs into the decision process by methods such as telepresence, thereby better leveraging the scarce resources of senior inspectors into industrial inspections at multiple sites. The handbook also includes non-technical topics of direct relevance to leadership, management, and adoption of this new philosophy. The handbook houses a wealth of essential information to help academics, industry professionals, regulatory bodies, and entrepreneurs navigate through this burgeoning new field. The material in this handbook is presented with the intention of ultimately improving human safety through reliable inspections and dependable maintenance of critical infrastructure while also enhancing business value through reduced downtime, affordable maintenance, and talent optimization. The content is positioned to inspire NDE professionals to think broadly in terms of their role as continuous value add rather than discrete decision support. This second edition contains many new chapters, and half of all chapters were revised from the 1st edition based on the engagement of authors through global platforms such as the ICDNT Specialist International Group on NDE 4.0 and the International conference series on NDE 4.0.

*Handbook of Research on Strategic Leadership in the Fourth Industrial Revolution* Zeki Simsek, Ciaran Heavey, Brian C. Fox, 2024-07-05. This pioneering Handbook surveys the research landscape of strategic leadership in what is referred to as the Fourth Industrial Revolution, a fusion of technologies and systems which blurs the boundaries between the digital, physical, and biological spheres. **Game, Set, AI** Diana Keller, 2024-10-11.
