## **Women Development And Change:**

Feminisms, Empowerment and Development Jenny Edwards, Andrea Cornwall, 2014-03-13 The economic and political empowerment of women continues to be a central focus for development agencies worldwide access to medical care education and employment as well as women s reproductive rights remain key factors effecting women s autonomy Feminisms Empowerment and Development explores what women are doing to change their own personal circumstances whilst providing an in depth analysis of collective action and institutionalized mechanisms aimed at changing structural relations Drawing on unique original research and approaching empowerment as a complex process of negotiation rather than a linear sequence of inputs and outcomes this crucial collection highlights the difficulty of creating common agendas for the advancement of women s power and rights and argues for a more nuanced context based approach to development theory and practice An indispensable text for anyone interested in gender and development this book shows that policies and approaches to development that view women as instrumental to other objectives will never promote women s empowerment as they fail to address the structures by which gender inequality is perpetuated over time

**Working Papers Series**, 2002 **Improving the Living Standards of Women Through Microfinance** Augustine Cheruiyot, 2002 *Women's Changing Roles and Status in Thieudeme, Senegal* Coumba Mar Gadio, 1999 This paper focuses on the changing roles and relative decision making power of the women farmers of Thieudeme Senegal Through interviews with three generations of women supplemented by document research and interviews with men and researchers sociological notions of change and power are combined with women s notions to tease out the details of role change from part time subsistence farming of hardy staples to full time farming and marketing of vegetables and evaluate women s decision making This technique also is used to compare women s perceptions of change factors drought economic crisis and a curse with those identified through historical and policy research including pressures on customary rights land tenure and markets We conclude that women s traditional arenas of decision making power have expanded along with responsibilities for farming and marketing As a result increased work burdens also improved their status in the community and households and were

factors in organizing and greater autonomy Nonetheless women are more likely to point to stress from increased burdens and conflicts than to conclude that change has brought any benefits International Social Science Journal ,2005-06
