Introduction To Blockchain & Cryptocurrencies Gurvy Kavei,2022-01-31 Document from the year 2022 in the subject Economics Finance grade A language English abstract The world gets more and more digitized every day People buy things on the internet trade stocks online and work in a digital world Overly the industrial revolution 4 0 determines our work life and free time In many places robots steered by artificial intelligence are replacing human labour With the ongoing technological progress it is hard to find a single modern organization not embracing artificial intelligence because it often saves time and money and is more accurate Today blockchain technology has become almost an insurmountable bedrock for business process automation product enhancement analytic speed and accuracy But why has blockchain taken on such a pivotal role How does cryptocurrency trade work What should you know about artificial intelligence Fintech crypto mining exchanges and trading This book explains the most important theories to understand the digitized world and its opportunities It points out a variety of entrepreneurial options Furthermore it illustrates where adaptation is happening in the world and how anyone can navigate this crusade of wealth creation in a regulation compliant manner to avoid criminalization and stereotyping Introduction to Blockchain Cryptocurrencies is intended for people who want to enter and explore this world for the first time It is also for people starting a career in trading mining and financial investments but more on the side of digital currencies This book is for you if you are generally an entrepreneur interested in diversifying your business portfolio If you are a policymaker and a regulator in the financial sector this book will undoubtedly open your eyes to a few things we usually tend to take for granted If you are a trainer interested in augmenting your training in the field of trading mining entrepreneurship policy formulation and simply appreciating global trends in the ecology of crypto and blockchain then be assured that this book will be of interest to you Blockchain and Web 3.0 Massimo Ragnedda,Giuseppe Destefanis,2019-07-09 Blockchain is no longer just about bitcoin or cryptocurrencies in general Instead it can be seen as a disruptive revolutionary technology which will have major impacts on multiple aspects of our lives The revolutionary power of such technology compares with the revolution sparked by the World Wide Web and the Internet in general Just as the Internet is a means of sharing information so blockchain technologies can be seen as a way to introduce the next level sharing value Blockchain and Web 3 0 fills the gap in our understanding of blockchain technologies by hosting a discussion of the new technologies in a variety of disciplinary settings Indeed this volume explains how such technologies are disruptive and comparatively examines the social economic technological and legal consequences of these disruptions Such a comparative perspective has previously been underemphasized in the debate about blockchain which has subsequently led to weaknesses in our understanding of decentralized technologies Underlining the risks and opportunities offered by the advent of blockchain technologies and the rise of Web 3 0 this book will appeal to researchers and academics interested in fields such as sociology and social policy cyberculture new media and privacy and data protection *Global Trends in Computer*

Technology and Their Impact on Export Control National Research Council (U.S.). Committee to Study International Developments in Computer Science and Technology, Seymour E. Goodman, 1988 This report consists of individual assessments focusing on the supply of computer technology and how it is evolving in the United States and Coordinating Committee for Multilateral Export Control CoCom countries It also provides an overview of the Soviet computing industry the status of major computing technologies there and an assessment of the impact of Mikhail Gorbachev s reforms on the future of Soviet computing and the trends in the Council for Mutual Economic Assistance CMEA countries The report examines how transfer of computer technologies can be controlled for national security purposes without retarding innovation and commercial development in the field and concludes with recommendations for the Department of State and other parties to administer a more flexible control regime

Bitcoins and Blockchain: Can Cryptocurrencies perform like Traditional Money? Julian Dressler, 2021-09-02 Academic Paper from the year 2021 in the subject Economics Macro economics general grade 1 0 Berlin School of Economics and Law language English abstract It seems as if the borders between cryptocurrencies and fiat money become blurrier Since the use of cryptocurrencies for payments is increasing while at the same time some countries are trying to restrict its use and develop own digital money it s unclear if Bitcoin could be considered a new form of money In this paper the author will explain the differences between both and try to find an answer to the question if cryptocurrencies can perform like traditional money

Evaluation of Potential Use Cases for Blockchain in the Insurance Industry Ricardo Escoda,2021-03-09 Master s Thesis from the year 2020 in the subject Economics Finance grade 1 3 International School of Management Campus Munich language English abstract Blockchain is considered to be a breakthrough technology with many strengths and opportunities but also weaknesses and threats for all industries around the globe It has the potential to revolutionize many sectors but it is not a universal remedy and does not replace every single traditional technology Most businesses do feel insecure whether to invest time and money for Research and Development due to the lack of industry standards and regulations with respect to the technology Before being able to guarantee suitability and successful implementation in any business it is essential to study the differences between public private hybrid and consortium Blockchain types In areas of application not strongly relying on Blockchain s distributed systems alternative solutions such as Big Data Analytics Artificial Intelligence and Machine Learning might be more valuable Nonetheless Blockchain promises the unique potential for insurance companies to efficiently serve global markets with areas of application mainly concentrating on parts of the VC where bureaucracy can be reduced by automation For instance the use of Smart Contracts where lots of data are analyzed saved distributed and pro cessed By implementing BC fields where the focus is on customer experience such as Payments Data Security Transparency and Developing New Business and Product

Ideas can be improved enormously Use cases and new products supported by Blockchain might include P2P Micro Insurances Ad hoc and Parametric Insurance Models Automized Underwriting Reduction of Fraud and Abuse and Health Insurance Processes Real Time Analytics in the Form of SCs Instant Pay Outs Automized Claims Management and Improved Risk Modelling of Insurance Businesses might be achievable by connecting Blockchain and Big Data Contrary to the expectations of the author most industry experts are aware of the benefits and opportunities the technology can bring to their companies Still Blockchain is not anchored in their medium to long term visions and strategies Most of the interviewees would rather act as active observers and early followers than taking the lead proactively Reasons for this behavior are the lack of market standards and regulations the absence of solid Blockchain networks and the shortage of use cases but also the lack of know how and data security concerns
