Understanding The City Contemporary And Future Perspectives:

Understanding the City John Eade, Christopher Mele, 2011-07-15 This cutting edge multi disciplinary analysis looks ahead to the direction which urban studies is likely to take during the twenty first century *Postdigital Theologies* Maggi Savin-Baden, John Reader, 2022-09-01 This book is about the relationships between technologies and the content of religious belief and practice A number of models are now starting to emerge but each of these depends on the theological or philosophical framework within which the debate is set At the same time there are dilemmas operating at different ends of the spectrum For example at one end there is a tendency towards subsuming the digital within the divine and at the other an instrumental stance relating to how technology is deployed Either of these stances could be said to ignore rather than acknowledge that the human itself is being changed as a result of the interactions with the digital The book explores the following areas Where is God to be found or present in the postdigital condition What are the implications of the postdigital condition for spirituality and indeed for the activity of God through the Holy Spirit How do concepts of transhumanism or posthumanism effect understandings of the incarnation Does the doctrine of the Trinity need revisiting in the light of the digital as medium of relationship Does Creation now include the postdigital What of the Kingdom of God now that the kingdom of the Tech giants is so powerful all consuming Contemporary Housing Struggles Ioana Florea, Agnes Gagy, Kerstin Jacobsson, 2022-04-21 This OA book provides a comparative study of housing contention in Budapest and Bucharest in 2008 2021 The financialization of housing and the resulting inequalities expulsions and social contention are a central characteristic of today s capitalist crisis These two East European cities that fall outside the usual focus of urban movements research provide an illuminating case of similar structural conditions governed by different political constellations at the national and local scales Instead of searching for unilinear narratives connecting structural tensions to politicized claims the book offers an in depth contextual analysis of multiple forms of contention their often unintentional interactions and their broader political structural background including tensions surrounded by political silence The authors analyze the two cases and their comparative lessons through what they propose as a structural field of contention approach to the multiple interconnected ways in which structural tensions become or not politicized in today s social movements The book will appeal to everyone interested in today s urban tensions and social movements Africa's Urban Revolution Doctor Edgar Pieterse, Susan Parnell, 2014-01-09 The facts of Africa s rapid urbanisation are startling By 2030 African cities will have grown by more than 350 million people and over half the continent s population will be urban Yet in the minds of policy makers scholars and much of the general public Africa remains a quintessentially rural place This lack of awareness and robust analysis means it is difficult to make a policy case for a more overtly urban agenda As a result there is across the continent insufficient urgency directed to responding to the challenges and opportunities associated with the world s last major wave of urbanisation Drawing on the expertise of scholars and practitioners associated with the African Centre for

Cities and utilising a diverse array of case studies Africa's Urban Revolution provides a comprehensive insight into the key issues demographic cultural political technical environmental and economic surrounding African urbanisation City Life from Jakarta to Dakar AbdouMaliq Simone,2010-01-27 By showing how much of what is considered peripheral to urban life is actually critical to it the book opens up new ways for understanding what it is possible to do in cities from now on City, Society, and Planning Baleshwar Thakur,2007 Vol I City 32 Papers in this volume provide an understanding of urban structure and problems ranging from national to the local level Vol II Society 28 Papers deal with social and cultural aspects drawn from experiences of many countries Vol III Planning 28 papers examine the different aspects of regional planning

involved in making local decisions the author looks at the impact of established policy making practices socio economic patterns among the population existing views of the local and the regional and their respective roles among the electorate and policy makers and the scope for building city regional governance under given statutory and fiscal provisions The complex interaction of these factors is shown to produce place specific forms and modi operandi for governing city regions as local regional constructs This book will be of interest to urban and regional policy makers and scholars working in the fields of economic geography and political geography
