## **Unified Methods For Censored Longitudinal Data And Causality:**

**Unified Methods for Censored Longitudinal Data and Causality** Mark J. van der Laan, James M Robins, 2012-11-12 During the last decades there has been an explosion in computation and information technology This development comes with an expansion of complex observational studies and clinical trials in a variety of fields such as medicine biology epidemiology sociology and economics among many others which involve collection of large amounts of data on subjects or organisms over time The goal of such studies can be formulated as estimation of a finite dimensional parameter of the population distribution corresponding to the observed time dependent process Such estimation problems arise in survival analysis causal inference and regression analysis This book provides a fundamental statistical framework for the analysis of complex longitudinal data It provides the first comprehensive description of optimal estimation techniques based on time dependent data structures subject to informative censoring and treatment assignment in so called semiparametric models Semiparametric models are particularly attractive since they allow the presence of large unmodeled nuisance parameters These techniques include estimation of regression parameters in the familiar multivariate generalized linear regression and multiplicative intensity models They go beyond standard statistical approaches by incorporating all the observed data to allow for informative censoring to obtain maximal efficiency and by developing estimators of causal effects It can be used to teach masters and Ph D students in biostatistics and statistics and is suitable for researchers in statistics with a strong interest in the analysis of complex longitudinal data

**Advanced Methodologies for Bayesian Networks** Joe Suzuki, Maomi Ueno, 2016-01-07 This volume constitutes the refereed proceedings of the Second International Workshop on Advanced Methodologies for Bayesian Networks AMBN 2015 held in Yokohama Japan in November 2015 The 18 revised full papers and 6 invited abstracts presented were carefully reviewed and selected from numerous submissions In the International Workshop on Advanced Methodologies for Bayesian Networks AMBN the researchers explore methodologies for enhancing the effectiveness of graphical models including modeling reasoning model selection logic probability relations and causality The exploration of methodologies is complemented discussions of practical considerations for applying graphical models in real world settings covering concerns like scalability incremental learning parallelization and so on

**Adaptive Treatment Strategies in Practice: Planning Trials and Analyzing Data for Personalized Medicine** Michael R. Kosorok, Erica E. M. Moodie, 2015-12-08 Personalized medicine is a medical paradigm that emphasizes systematic use of individual patient information to optimize that patient's health care particularly in managing chronic conditions and treating cancer In the statistical literature sequential decision making is known as an adaptive treatment strategy ATS or a dynamic treatment regime DTR The field of DTRs emerges at the interface of statistics machine learning and biomedical science to provide a data driven framework for precision medicine The authors provide a learning by seeing approach to the development of ATSS aimed at a broad audience of health researchers All estimation procedures used are described in sufficient heuristic and

technical detail so that less quantitative readers can understand the broad principles underlying the approaches At the same time more quantitative readers can implement these practices This book provides the most up to date summary of the current state of the statistical research in personalized medicine contains chapters by leaders in the area from both the statistics and computer sciences fields and also contains a range of practical advice introductory and expository materials and case studies **Causal Inference in Longitudinal Studies** Zhuo Yu,2002 **Aging, Place, and Health**

Satariano,Marlon Maus,2017-03-03 Aging Place and Health A Global Perspective examines the interplay of biological social and environmental factors affecting the health and well being of aging individuals their families and communities With a strong interdisciplinary focus this book provides a clear coherent structure to address the diversity of topics in this increasingly vital field The second edition maintains the ecological approach using the same framework as in the first edition The ecological model serves as a template for the organization of the book The new edition provides a more global focus and introduces new topics such as the impact of technology This edition also introduces a new co editor as well as specific chapters prepared by leading experts in the field **Handbook of Big Data** Peter Bühlmann,Petros Drineas,Michael

Kane,Mark van der Laan,2016-02-22 Handbook of Big Data provides a state of the art overview of the analysis of large scale datasets Featuring contributions from well known experts in statistics and computer science this handbook presents a carefully curated collection of techniques from both industry and academia Thus the text instills a working understanding of key statistical **Advances in Survival Analysis** Narayanaswamy Balakrishnan,C.R. Rao,2004-01-30 Handbook of Statistics Advances in Survival Analysis covers all important topics in the area of Survival Analysis Each topic has been covered by one or more chapters written by internationally renowned experts Each chapter provides a comprehensive and up to date review of the topic Several new illustrative examples have been used to demonstrate the methodologies developed The book also includes an exhaustive list of important references in the area of Survival Analysis Includes up to date reviews on many important topics Chapters written by many internationally renowned experts Some Chapters provide completely new methodologies and analyses Includes some new data and methods of analyzing them **Probabilistic and Causal**

**Inference** Hector Geffner,Rina Dechter,Joseph Halpern,2022-03-10 Professor Judea Pearl won the 2011 Turing Award for fundamental contributions to artificial intelligence through the development of a calculus for probabilistic and causal reasoning This book contains the original articles that led to the award as well as other seminal works divided into four parts heuristic search probabilistic reasoning causality first period 1988 2001 and causality recent period 2002 2020 Each of these parts starts with an introduction written by Judea Pearl The volume also contains original contributed articles by leading researchers that analyze extend or assess the influence of Pearl s work in different fields from AI Machine Learning and Statistics to Cognitive Science Philosophy and the Social Sciences The first part of the volume includes a biography a transcript of his Turing Award Lecture two interviews and a selected bibliography annotated by him **Statistical**
