**John Robinson Gregory**

## **The End Of Evolution:**

*Extinction: Evolution and the End of Man* Michael Boulter, 2010-10-07 How long do humans have left on Earth Using cutting edge science that revolutionises our understanding of evolution Michael Boulter explains how we may be closer to our own extinction than we imagined

[The End of Evolution](#) Peter Douglas Ward, 1995 A finalist for a Los Angeles Times book award this contagiously enthusiastic book eloquently recreates the dramatic history of life and its great extinctions and issues an unprecedentedly compelling call to act to preserve our planet's biodiversity

**The End of Evolution** Peter Ward, 1995 A controversial account of the complex issues surrounding the three mass extinctions found in the geological record The author concludes that the most recent extinction which began at the end of the last Ice Age is directly caused by humans

[The End of Evolution?](#) Martin Lyons, 2016-05-16 The human race what exactly are we racing towards Our desires are endless and our actions in pursuit of their fulfillment are unsustainable along with their consequences Indeed many people today wonder about the survival of our species To change the direction we're headed in we need to take a new critical look at the underlying beliefs that are steering us The reason we see for our future is a natural extension of the reason we see for our past i.e. our belief about how we got here

The End of Evolution will inform and uplift your perspective on life its evolution and purpose In the words of one reviewer The End of Evolution is a bold and captivating book that critically explores not only the topic of evolution but also dogma in all its forms including the dogmas of science and of religion It is a book that with tremendous clarity and charm reveals the essential value of rational skepticism particularly with regard to the theory of evolution Through wise and poignant analogies Lyons again and again eloquently disarms some of science's most sacred doctrines Yet his open and unhostile voice welcomes readers of all backgrounds I am myself an agnostic and the curious reader who bares an open mind is rewarded on every page

The End of Evolution questions today's most widely accepted belief with an open minded rational appraisal of where we are and where we are likely headed

Thomas Nagel one of the world's foremost atheistic philosophers recently lent serious credibility and relevance to precisely such questioning in his book *Mind Cosmos Why the Materialist Neo Darwinist Conception is Almost Certainly False* The old out of hand dismissal of any anti evolutionary stance as being but a religious promotion no longer holds true Many scientists and scholars now challenge this theory due to its own flaws and inadequacies without any reference to personal beliefs or ideologies

The End of Evolution is free from the tired motive of hoping to establish some brand of religion by default The current accepted truth of how we all got here may be false The purpose of this book is to reinvigorate the paths of scientific and philosophical enquiry This will rejuvenate the general direction society is taking

The End of Evolution promises to empower you the reader Written in an easy and non technical style with many analogies and examples from nature the subject becomes readily accessible and clear It will extend you an opportunity and an invitation to think critically for yourself unburdened by either secular or religious dogmas
