

# Blockchain Technology Explained

A blockchain is an online database, popularly used for cryptocurrency transactions, that stores information chronologically and in blocks.

1

Information is recorded in a block.

2

Once the block is full, it's chained to the rest of the blocks in the database.

3

An empty block is added to the end of the chain to record new information.

*Ownership, Financial Accountability and the Law* Paul

Beckett,2019-05-08 There is something visceral about ownership This is mine you can t have it This is mine you can share it This is ours Try to find it Contemporary literature and investigative journalism are showing that the scale of the problem of tax evasion money laundering organised crime terrorism bribery corruption and gross human rights abuses is vast Ownership specifically the quest to identify beneficial owners has been chosen by national and international regulators as the touchstone the litmus test in the fight back An owner by definition must possess something for which they are financially accountable But what is meant by ownership This book explains why ownership is pivotal to accountability and what ownership means in common law civil law and Shariah law terms It looks in detail at State regional and international transparency strategies and at an equally powerful global private counter initiative to promote beneficial ownership avoidance through the use of so called orphan structures Where there is no owner there is no accountability The distinction between privacy and legitimate confidentiality on the one hand and concealment on the other is explained with reference to

commercial and trade law and practice principles of corporate governance and applicable business human rights This book introduces one further counter initiative the phenomenon of transient ownership made possible through the use of cryptocurrency and the blockchain The study concludes with a blueprint for action with recommendations addressed to states international organisations practitioners and other stakeholders
