Evaluation of Potential Use Cases for Blockchain in the Insurance Industry Ricardo Escoda,2021-03-09 Master s Thesis from the year 2020 in the subject Economics Finance grade 1 3 International School of Management Campus Munich language English abstract Blockchain is considered to be a breakthrough technology with

many strengths and opportunities but also weaknesses and threats for all industries around the globe. It has the potential to revolutionize many sectors but it is not a universal remedy and does not replace every single traditional technology. Most businesses do feel insecure whether to invest time and money for Research and Development due to the lack of industry standards and regulations with respect to the technology. Before being able to guarantee suitability and successful implementation in any business, it is essential to study the differences between public, private, hybrid, and consortium Blockchain types. In areas of application not strongly relying on Blockchain's distributed systems, alternative solutions such as Big Data Analytics, Artificial Intelligence, and Machine Learning might be more valuable. Nonetheless, Blockchain promises the unique potential for insurance companies to efficiently serve global markets with areas of application mainly concentrating on parts of the VC where bureaucracy can be reduced by automation. For instance, the use of Smart Contracts where lots of data are analyzed, saved, distributed, and processed. By implementing BC fields where the focus is on customer experience such as Payments, Data Security, Transparency, and Developing New Business and Product Ideas can be improved enormously. Use cases and new products supported by Blockchain might include P2P Micro Insurances, Ad hoc and Parametric Insurance Models, Automated Underwriting, Reduction of Fraud and Abuse, and Health Insurance Processes. Real Time Analytics in the Form of SCs, Instant Pay Outs, Automated Claims Management, and Improved Risk Modelling of Insurance Businesses might be achievable by connecting Blockchain and Big Data. Contrary to the expectations of the author, most industry experts are aware of the benefits and opportunities the technology can bring to their companies. Still, Blockchain is not anchored in their medium to long term visions and strategies. Most of the interviewees would rather act as active observers and early followers than taking the lead proactively. Reasons for this behavior are the lack of market standards and regulations, the absence of solid Blockchain networks, and the shortage of use cases but also the lack of know-how and data security concerns.

Aircraft Management Activities. A Systematic Review Muflaha Jafar, 2024-10-10 Master's Thesis from the year 2024 in the subject Business economics Project Management London Metropolitan University language English abstract. This systematic review seeks to answer the questions regarding the development process, efficiency issues, and trends in the application of aircraft maintenance and management approaches. With ongoing changes in regulatory requirements, technological development, and cost control remaining critical issues for the aviation industry, it is therefore imperative to gain an appreciation of the evolution of maintenance practices. The review is based on the collection of secondary qualitative articles from various peer-reviewed papers and industry reports starting from the year 2000. The main themes explored in the review include historical overview, change from reactive to proactive maintenance techniques, preventive, predictive, and condition-based maintenance techniques and strategies. The work shows that there is a rather sharp shift from what the authors call the reactive maintenance paradigm where the primary objective is to repair failed assets to the so-called smart maintenance which is based on the use of big data and analytics, AI, robotics, digital twins, and the like. Among new effective

methodologies we can single out predictive and condition based maintenance which taking advantage of real time data analytics and sensor technologies proved their effectiveness in terms of reducing the time spent on failures costs and increasing safety in comparison with previous methods *The Cryptogram* ,1979 **The British National Bibliography** Arthur James Wells,2006 **Trends and Developments in Entrepreneurial Finance. Implications for a Startup's Signaling Strategy** Alexander Kolloge,2018-09-10 Bachelor Thesis from the year 2018 in the subject Business economics Investment and Finance grade 1 0 University of Mannheim Chair of Strategic and International Management Prof Dr Matthias Brauer language English abstract The landscape of entrepreneurial finance is currently subject to a process of transformation driven by globalization technological advancements regulatory adjustments and the emergence of winner take all markets These factors jointly pave the way for new forms of financing which differ significantly from traditional forms in terms of investor structure experience and behavior To analyze how startups can ensure financial coverage in the light of these changing conditions this review compares strategies of attracting traditional and new types of investors from a signaling perspective In business practice this topic is highly relevant as many young startups require substantial amounts of external capital to grow but often have no objective firm data to provide to investors Thus the selection of effective soft signals about startup quality preferably aligned with the preferences of the respective investor group can decide about short term survival and long term performance Findings include that the most promising signaling strategies for traditional forms of financing are based on startup characteristics i e what a firm is In contrast the most effective signals for new forms of financing are based on startup actions i e what a firm does Moreover while personal networks have been found to be highly relevant for traditional forms online networks increase the funding prospects for new forms of financing Through a consolidation and analysis of the current state of research in leading management entrepreneurship and finance journals this review aims at providing a comprehensive overview of the issue and identifying avenues for future research
