The American "commercial Invasion" of Europe Frank Arthur Vanderlip, 1976 *The UN and Transnational Corporations* Tagi Sagafi-nejad, John H. Dunning, 2008-10-16 Are transnational corporations TNCs and foreign direct investment beneficial or harmful to societies around the world Since the birth of the United Nations more than 60 years ago these questions have been major issues of interest and involvement for UN institutions What have been the key ideas generated by the UN about TNCs and their relations with nation states How have these ideas evolved and what has been their impact This book examines the history of UN engagement with TNCs including the creation of the UN Commission and Centre on Transnational Corporations in 1974 the failed efforts of these bodies to craft a code of conduct to temper the revealed abuses of TNCs and with the advent of globalization in the 1980s the evolution of a more cooperative relationship between TNCs and developing countries resulting in the 1999 Global Compact

Consumers' Imperium Kristin L. Hoganson, 2010-03-15 Histories of the Gilded Age and Progressive Era tend to characterize the United States as an expansionist nation bent on Americanizing the world without being transformed itself In *Consumers Imperium* Kristin Hoganson reveals the other half of the story demonstrating that the years between the Civil War and World War I were marked by heightened consumption of imports and strenuous efforts to appear cosmopolitan Hoganson finds evidence of international connections in quintessentially domestic places American households She shows that well to do white women in this era expressed intense interest in other cultures through imported household objects fashion cooking entertaining armchair travel clubs and the immigrant gifts movement From curtains to clothing from around the world parties to arts and crafts of the homelands exhibits Hoganson presents a new perspective on the United States in the world by shifting attention from exports to imports from production to consumption and from men to women She makes it clear that globalization did not just happen beyond America's shores as a result of American military might and industrial power but that it happened at home thanks to imports immigrants geographical knowledge and consumer preferences Here is an international history that

begins at home **Made in Britain** Stephen Tuffnell,2020-09-08 The United States was made in Britain For over a hundred years following independence a diverse and lively crowd of emigrant Americans left the United States for Britain From Liverpool and London they produced Atlantic capitalism and managed transfers of goods culture and capital that were integral to US nation building In British social clubs emigrants forged relationships with elite Britons that were essential not only to tranquil transatlantic connections but also to fighting southern slavery As the United States descended into Civil War emigrant Americans decisively shaped the Atlantic wide battle for public opinion Equally revered as informal ambassadors and feared as anti republican contagions these emigrants raised troubling questions about the relationship between nationhood nationality and foreign connection Blending the histories of foreign relations capitalism nation formation and transnational connection Stephen Tuffnell compellingly demonstrates that the United States struggle toward independent nationhood was entangled at every step with the world s most powerful empire of the time With deep research and vivid detail **Made in Britain** uncovers this hidden story and presents a bold new perspective on nineteenth century trans Atlantic relations Empire in Retreat Victor Bulmer-Thomas,2018-03-27 A sweeping history of the United States through the lens of empire and an incisive look forward as the nation retreats from the global stage A respected authority on international relations and foreign policy Victor Bulmer Thomas offers a grand survey of the United States as an empire From its territorial expansion after independence through hegemonic rule following World War II to the nation s current imperial retreat the United States has had an uneasy relationship with the idea of itself as an empire In this book Bulmer Thomas offers three definitions of empire territorial informal and institutional that help to explain the nation s past and forecast a future in which the United States will cease to play an imperial role Arguing that the move toward diminished geopolitical dominance reflects the aspirations of most U S citizens he asserts that imperial retreat does not necessarily mean national decline and may ultimately strengthen the nation state At this pivotal juncture in American history Bulmer Thomas s uniquely global perspective will be widely read and discussed across a range of fields **Monographic Series** Library of Congress,1977 One Hundred Years of American Commerce Chauncey Mitchell Depew,1895 **One Hundred Years of American Commerce, 1795-1895** Chauncey M.
