101 Creative Writing Activities (eBook) Tracey Ann Schofield,2000-03-01 I don't know what to write about is the common response when kids are asked to indulge in creative writing. This lively collection of unique writing activities will quiet that complaint forever. The 101 fun and functional creative writing activities in this book were designed to stimulate the interest and creativity of children. The author's philosophy is if it's fun, kids will do it. It is obvious in such whimsical ideas as having students write 10 ways to complete the sentence "If I were a ___ I would ___" or challenging them to write home remedies for the common cold, a headache, sibling rivalry, homework overload, etc. These writing activities encourage kids to write about what they know best, themselves, and turn writing practice into a time of self-expression. Teaching with Tablets Helen Caldwell, James Bird, 2015-03-19 The presence of handheld technologies in the classroom isn t enough you need to know how to use them to enhance teaching and transform learning As more and more primary schools acquire devices such as iPads and tablets it is becoming clear that adding them as a classroom resource is not enough Teachers and trainees need strategies to integrate these into existing learning contexts in a meaningful way Without this these fantastic resources lose their value This book helps teachers to make the most of these devices in the primary classroom It offers guidance on how to use tablets to devise meaningful learning activities embed them in genuine curriculum contexts drawing upon case studies from existing practice It is written for non specialists and explains technical terms in an accessible practical way Each chapter begins with a case study contributed by a teacher using tablets in schools Real life examples and comments like this give the text a truly practical focus The book s Pinterest board includes the apps mentioned in the book as well as a handy infographic for a snapshot guide on starting off your tablet teaching journey A note from the authors The use of technology in schools continues to evolve rapidly as new devices and tools become available and the adoption of mobile devices such as iPads and tablets has been a particularly exciting development in recent years The benefits offered by these technologies such as their portability connectivity accessibility and range of media present new challenges and opportunities for teaching and learning As the take up of tablets gathers pace in our schools there is a need for advice on the best approaches and apps to help achieve successful learning outcomes Teachers need to find meaningful ways to integrate the devices into their own practice and to evaluate which of the many thousands of educational apps might be appropriate for their pupils This book considers how iPads and tablets can be used to enhance teaching and learning in primary schools It is especially relevant in the light of the computing curriculum which puts a new emphasis on children as makers and creators of digital content Across other curriculum subjects too the introduction of mobile devices that can be quickly and reliably accessed has precipitated a shift in practice For example they have enabled teachers and children to spontaneously pursue lines of inquiry to connect collaborate and publish in many different ways and to use their digital skills to enhance their exploration of the physical world outside the classroom With these opportunities in mind we offer anecdotes from the classroom and examples of how tablets might be embedded within current pedagogy and practice as a natural learning tool Each chapter combines a practical case study with discussion of related pedagogy and recommends apps to

EBOOK: Developing Literacy and Creative Writing through Storymaking: Story Strands for 7-12 year olds Steve Bowkett, 2010-08-16 This exciting practical resource is full of immediately usable activities to help children develop their literacy skills and creative writing abilities. The story strand technique begins with one simple picture and by adding others to form a sequence shows children how to build narrative in an enjoyable creative and systematic way. Story strand activities help children weave their thoughts into a coherent pattern and so become more skilful writers. The activities are sequenced to increase the creative and intellectual demands on pupils and can also be used individually to highlight different aspects of the writing process such as:

- Exploring the varied meanings of certain words through association webs
- Moving from simple to more complex sentences
- Learning how to enrich writing using strong vivid adjectives, verbs and adverbs
- Understanding how to use connectives more insightfully to give narrative a greater logical consistency
- Creating narrative refinements such as subplots, flashbacks and cliffhangers out of basic plot sequences

A thinking skills agenda underpins each story strand game and many promote speaking and listening skills by encouraging discussion and collaborative exploration of the images. Supported by a companion website that includes downloadable images from the book, colour images and worked examples for the story string idea, additional activities and games as well as links to the National Curriculum.
