Storytelling in Management Practice Stefanie Reissner, Victoria Pagan, 2013-06-03 Since the early 2000s storytelling as a means of managerial communication has been increasingly advocated with a focus on the management practices of leadership change and organizational culture Most research on storytelling in management practice derives from practitioner experience but little is known about the specific dynamics behind storytelling as a tool for managerial communication This book derives from one of the first research studies into storytelling in management practice which sought to evaluate the assumed but not necessarily proven effectiveness of storytelling as a management tool Building on existing theories of narrative and storytelling in organizations the book explores how managers use storytelling in their daily practice revealing that it can be employed both purposively like a tool and perceptively spontaneously and intuitively The book explains that storytelling has different functions in management practice at different levels of the organization such as Creating direction for the organization Translating strategic messages into operational ones and supporting the professional development of staff Shaping the organization's social fabric through the sharing of personal stories Aided by a wealth of interviews and case studies **Storytelling in Management Practice** reveals an analysis of the dynamic relationship between story teller audience and organizational context As such it will be useful for students and researchers working across a variety of sub disciplines including leadership organizational behaviour and business communication
