Masterson,2013-05-14 Designed to appeal to expert and backyard birdwatchers alike this comprehensive guide reveals where when and how to watch and enjoy birds in New Hampshire It not only offers the latest information about the seasonal status and distribution of birds in New Hampshire but also features a thorough introduction to the art and practice of birdwatching including equipment ethics migration conservation and most of all finding that good bird The heart of the book is the detailed descriptions and maps that outline more than 120 birding sites across the state from the Connecticut River Valley to Jeffreys Ledge and Cashes Ledge far off the coast Drawing upon his extensive knowledge of the habits and habitats of New Hampshire birds the author has divided the state into six regions each with a rich diversity of birdwatching destinations The guide also features informative accounts of the more than 300 bird species regularly seen in the Granite State including their preferred habitats and graphs illustrating when each is most likely to be encountered In addition Masterson also provides a useful guide to rare and accidental bird sightings The essential guide to birdwatching in New Hampshire for beginners and accomplished regional birders      **Walking in Britain** ,2001      The Cultural Moment in Tourism Laurajane Smith,Emma Waterton,Steve Watson,2012-07-26 This book is a response to the burgeoning interest in cultural tourism and the associated need for a coherently theorized approach for understanding the practices that such an interest creates Cultural tourism has become an important and popular aspect of contemporary tourism studies as well as providing a rich seam of upscale product development opportunities in the industry as a whole Much of the related literature however focuses upon describing and categorizing cultural tourism from a supply side

perspective This has prompted the taxonomizing of cultural tourists on the basis of their level of involvement and interest in cultural tourism products and or their economic worth as a sought after market segment There have been few recent attempts at a rigorous re theorization of the issues beyond conventional representational theories this book aims to fill that void This groundbreaking volume provides a theoretical and empirical account of what it means to be a cultural or heritage tourist It achieves this by exploring the interactions of people with places spaces intangible heritage and ways of life not as linear alignments but as seductive moments of encounter engagement performance and meaning making which are constitutive of cultural experience in its broadest sense The book further explores encounters in cultural tourism as events that capture and constitute important social relations involving power and authority self consciousness and social position gender and space history and the present It also explores the consequences these insights have for our understanding of culture and heritage and its management in the context of tourist activity In capturing the cultural moment this book provides a better understanding of the motivations on site activities meaning constructions and other cultural work done by both tourists and tourist operators The volume confronts and explores the cultural political and economical interrelations between culture heritage and the tourism industry In so doing it also investigates how this co mingling of identity representation and social life may be better apprehended with the wider shift in critical thought towards notions of affect and performativity The book is a fundamental and influential contribution to research in this field It will be of significant value to students academics and researchers interested in this broad topic area
