

Pretexting 101

Pretexting is a form of social engineering whereby a cybercriminal stages a scenario that baits victims into providing valuable information that they wouldn't otherwise.

A fraudster **impersonates a trusted authority** and crafts a scenario to reach out to their victims.

The victim **believes the scenario** and shares any information the 'trusted' authority requests.

The fraudster **gains valuable information** from their victim and often uses it maliciously.
