Selman, 1993 *Structural Complexity I* Jose L. Balcazar, Josep Diaz, Joaquim Gabarro, 2012-12-06 In the six years since the first edition of this book was published the field of Structural Complexity has grown quite a bit However we are keeping this volume at the same basic level that it had in the first edition and the only new result incorporated as an appendix is the closure under complementation of nondeterministic space classes which in the previous edition was posed as an open problem This result was already included in our Volume II but we feel that due to the basic nature of the result it belongs to this volume There are of course other important results obtained during these last six years However as they belong to new areas opened in the field they are outside the scope of this fundamental volume Other changes in this second edition are the update of some Bibliographical Remarks and references correction of many mistakes and typos and a renumbering of the definitions and results Experience has shown us that this new numbering is a lot more friendly and several readers have confirmed this opinion For the sake of the reader of Volume II where all references to Volume I follow the old numbering we have included here a table indicating the new number corresponding to each of the old ones
