Structures in Dynamics H.W. Broer, F. Dumortier, S.J. van Strien, F. Takens, 1991-11-05 The study of non linear dynamical systems nowadays is an intricate mixture of analysis geometry algebra and measure theory and this book takes all aspects into account Presenting the contents of its authors graduate courses in non linear dynamical systems this volume aims at researchers who wish to be acquainted with the more theoretical and fundamental subjects in non linear dynamics and is designed to link the popular literature with research papers and monographs All of the subjects covered in this book are extensively dealt with and presented in a pedagogic form These include the presentation of an environment for the route to chaos by quasi periodicity which is related to the Landau Lifschitz and Ruelle Takens scenarios concerning the onset of turbulence the theories of 1 dimensional dynamics singularities in planar vector fields and quasi periodicity in dissipative systems

Dynamical Systems on 2- and 3-Manifolds Viacheslav Z. Grines, Timur V. Medvedev, Olga V. Pochinka, 2016-11-11 This book provides an introduction to the topological classification of smooth structurally stable diffeomorphisms on closed orientable 2 and 3 manifolds The topological classification is one of the main problems of the theory of dynamical systems and the results presented in this book are mostly for dynamical systems satisfying Smale's Axiom A The main results on the topological classification of discrete dynamical systems are widely scattered among many papers and surveys This book presents these results fluidly systematically and for the first time in one publication Additionally this book discusses the recent results on the topological classification of Axiom A diffeomorphisms focusing on the nontrivial effects of the dynamical systems on 2 and 3 manifolds The classical methods and approaches which are considered to be promising for the further research are also discussed by The reader needs to be familiar with the basic concepts of the qualitative theory of dynamical systems which are presented in Part 1 for convenience The book is accessible to ambitious undergraduates graduates and researchers in dynamical systems and low dimensional topology This volume consists of 10 chapters each chapter contains its own set of references and a section on further reading Proofs are presented with the exact statements of the results In Chapter 10 the authors briefly state the necessary definitions and results from

algebra geometry and topology When stating ancillary results at the beginning of each part the authors refer to other sources which are readily available

Introduction to Nonextensive Statistical Mechanics Constantino Tsallis,2023-01-30 This book focuses on nonextensive statistical mechanics a current generalization of Boltzmann Gibbs BG statistical mechanics Conceived nearly 150 years ago by Maxwell Boltzmann and Gibbs the BG theory one of the greatest monuments of contemporary physics exhibits many impressive successes in physics chemistry mathematics and computational sciences Presently several thousands of publications by scientists around the world have been dedicated to its nonextensive generalization A variety of applications have emerged in complex systems and its mathematical grounding is by now well advanced Since the first edition release thirteen years ago there has been a vast amount of new results in the field all of which have been incorporated in this comprehensive second edition Heavily revised and updated with new sections and figures the second edition remains the go to text on the subject A pedagogical introduction to the BG theory concepts and their generalizations nonlinear dynamics extensivity of the nonadditive entropy global correlations generalization of the standard CLT s complex networks among others is presented in this book as well as a selection of paradigmatic applications in various sciences together with diversified experimental verifications of some of its predictions Introduction to Nonextensive Statistical Mechanics is suitable for students and researchers with an interest in complex systems and statistical physics
