Structured Rapid Prototyping John L. Connell, Linda Shafer, 1989 *Quality Software Project Management* Robert T. Futrell, Donald F. Shafer, Linda Shafer, 2002 Annotation Drawing on best practices identified at the Software Quality Institute and embodied in bodies of knowledge from the Project Management Institute the American Society of Quality IEEE and the Software Engineering Institute Quality Software Project Management teaches 34 critical skills that allow any manager to minimize costs risks and time to market Written by leading practitioners Robert T Futrell Donald F Shafer and Linda I Shafer it addresses the entire project lifecycle covering process project and people It contains extensive practical resources including downloadable checklists templates and forms *Object-oriented GUI Application Development* Geoff Lee, 1993 An excellent training guide for project managers user interface designers and software engineers this book provides step by step instructions guidelines and examples of the life cycle development methodology that can be applied to multiple graphical environments **Object-oriented Rapid Prototyping** John L. Connell, Linda Shafer, 1995 For programmers interested in object oriented methods this how to book provides a guide for understanding and practicing one of the new development paradigms the object oriented rapid prototyper that can produce high quality clearly documented easily maintainable software providing the highest possible user satisfaction with minimum total effort **Instructional Design:**

International Perspectives II Sanne Dijkstra, Franz Schott, Norbert Seel, Robert D. Tennyson, Norbert M. Seel, 2014-03-18 Instructional design theory and practice has evolved over the past 30 years from an initial narrow focus on programmed instruction to a multidimensional field of study integrating psychology technology evaluation measurement and management The growth of instructional design ID has occurred because of direct needs problems and goals from society Its application in planning instruction first developed in the United States with the Department of Defense during World War II with the purpose of meeting immediate concerns for effective training of larger numbers of military personnel From the beginning ID has rapidly expanded into applications in industrial and executive training vocational training classroom learning and professional education Although ID has its roots in the U S applications and theoretical growth is an international activity However literature at the international level is still limited to either individual author contributions or collections primarily represented by single countries As a result there is no standard reference source that contains the rich variety of theories and applications to form the international foundation for the field The goal of this two volume set is to establish international foundations for ID theory research and practice within the framework of the two following objectives to identify and define the theoretical research and model foundations for ID and to bridge the gap between ID foundations and application Volume I includes chapters on philosophical and theoretical issues on learning theory and ID models Volume II provides an overview of the state of the art of solving ID problems The contributors offer contrasting points of view which provide a rare opportunity to see the diversity and complexity in the field The editorial committee has selected a wide range of

internationally known authors to make presentations in the topic areas of the field **Design, Manufacturing And Mechatronics - Proceedings Of The 2015 International Conference (Icdmm2015)** A Mehran Shahhosseini,2015-09-23 This book brings together one hundred and seventy nine selected papers presented at the 2015 International Conference on Design Manufacturing and Mechatronics ICDMM2015 which was successfully held in Wuhan China during April 17 18 2015 The ICDMM2015 covered a wide range of fundamental studies technical innovations and industrial applications in advanced design and manufacturing technology automation and control system communication system and computer network signal and image processing data processing and intelligence system applied material and material processing technology power and energy technology and methods for measure test detection and monitoring applied mechatronics technology and methods for ship navigation and safety and other engineering topics All papers selected here were subjected to a rigorous peer review process by at least two independent peers The papers were selected based on innovation organization and quality of presentation The proceedings should be a valuable reference for scientists engineers and researchers interested in design manufacturing and mechatronics as well as graduate students working on related technologies *IEEE International Workshop on Rapid Systems Prototyping* IEEE Computer Society.
