Framework Blockchain Explained:

Frameworks for Blockchain Standards, Tools, Testbeds, and Platforms Ramakrishna, Yanamandra, Keer, Priyameet Kaur, 2024-01-17 In an era of rapid technological advancements blockchain technology has emerged as a groundbreaking solution for decentralized trust and immutable record keeping Frameworks for Blockchain Standards Tools Testbeds and Platforms delves into the intricate world of blockchain offering a comprehensive exploration of its various dimensions At its core blockchain disrupts the traditional notion of a centralized trusted authority instead relying on multiple sources of trust and algorithmic consensus for validation This handbook elucidates the transformative power of blockchain examining its capacity to offer enduring records that resist modification by trusted or untrusted sources The concept of mining akin to decentralized peer review is demystified in the context of the Bitcoin protocol which paved the way for subsequent advancements like Ethereum a decentralized open source platform enabling a diverse array of blockchain applications This book serves as an indispensable guide for various stakeholders including researchers academicians industry practitioners policy makers corporate executives venture capitalists and entrepreneurs With its inclusive approach the book also benefits those indirectly involved in blockchain and its applications It is equally valuable for undergraduate graduate and research level students seeking to explore the transformative potential of blockchain technology

Architectures and Frameworks for Developing and Applying Blockchain Technology Shi, Nansi, 2019-06-28 The blockchain revolution has drastically impacted global economics and the strategic practices within different industries Cryptocurrency specifically has forever changed the face of business and the implementation of business online While innovative people are still in the early stages of building and developing blockchain technology and its applications and it is critical that researchers and practitioners obtain a better understanding of this global phenomenon Architectures and Frameworks for Developing and Applying Blockchain Technology is an essential reference source that presents the technological foundation recent research findings developments and critical issues associated with blockchain technology from both computer science and social science perspectives Featuring topics such as artificial intelligence digital economy and network technology this book is ideally designed for academics researchers industry leaders IT consultants engineers programmers practitioners government officials policymakers and students

Cyber Forensic Frameworks for User-Centric Human Threat Intelligence Analysis Kadry, Seifedine, Rai, Mritunjay, Tripathi, Padmesh, 2026-01-30 As cyber threats grow in scale sophistication and human involvement traditional technical defenses struggle to protect digital ecosystems Cyber forensic frameworks evolve toward user centric human threat intelligence analysis recognizing that attackers insiders and victims are all human actors with distinct behaviors motivations and decision patterns By integrating behavioral analytics digital trace evidence and contextual user data these frameworks enable investigators to move toward proactive threat identification and attribution Focusing on the human dimension of cyber forensics may further enhance the accuracy of threat intelligence while

supporting more adaptive ethical and resilient security strategies in complex digital environments Cyber Forensic Frameworks for User Centric Human Threat Intelligence Analysis explores the integration of cyber forensic methodologies with human threat intelligence to enhance security and investigative measures against sophisticated cyber threats It provides a structured framework for analyzing human driven cyber threats incorporating behavioral analysis AI and forensic technologies This book covers topics such as cybercrime social engineering and privacy rights and is a useful resource for engineers security professionals academicians researchers and scientists

An Anatomy of Tax Havens Paul R. Beckett,2023-10-24 Tax havens in offshore lands like Switzerland the Cayman Islands and the Bahamas were once considered a rarity the preserve of the super rich Today they are big business available to the masses Their goal To avoid any form of accountability Own nothing Possess everything Be answerable to no one Where are these tax havens What forms can they take What future lies in store for them and why should we care An Anatomy of Tax Havens Europe the Caribbean and the United States of America answers these questions and more in the first comparative study in one volume of European Caribbean and United States tax havens It examines their simple origin to the extreme forms some take today delving into the murky subculture that has deliberately made them impenetrably obscure Uniquely it combines detailed technical expertise regulatory regimes financial crime legal and equitable structuring with an analysis of their impact on domestic and global political economic environmental and social concerns An Anatomy of Tax Havens is a fascinating informative read for a broad readership from legal accountancy and tax practitioners to compliance regulators law enforcement agencies and students and researchers interested in business studies taxation and crime

Research Challenges in Information Science: Information Science and the Connected World Selmin Nurcan,Andreas L. Opdahl,Haralambos Mouratidis,Aggeliki Tsohou,2023-05-22 This book constitutes the proceedings of the 17th International Conference on Research Challenges in Information Sciences RCIS 2023 which took place in Corfu Greece during May 23 26 2023 It focused on the special theme Information Science and the Connected World The scope of RCIS is summarized by the thematic areas of information systems and their engineering user oriented approaches data and information management business process management domain specific information systems engineering data science information infrastructures and reflective research and practice The 28 full papers presented in this volume were carefully reviewed and selected from a total of 87 submissions The book also includes 15 Forum papers and 6 Doctoral Consortium papers The contributions were organized in topical sections named Requirements conceptual modeling and ontologies machine learning and analytics conceptual modeling and semantic networks business process design and computing in the continuum requirements and evaluation monitoring and recommending business process analysis and improvement user interface and experience forum papers doctoral consortium papers Two page abstracts of the tutorials can be found in the back matter of the volume
