Do Metaphors Dream of Literal Sleep? Seo-Young Chu, 2011-01-15 In culture and scholarship science fictional worlds are perceived as unrealistic and altogether imaginary Seo Young Chu offers a bold challenge to this perception of the genre arguing instead that science fiction is a form of high intensity realism capable of representing non imaginary objects that elude more traditional realist modes of representation Powered by lyric forces that allow it to transcend the dichotomy between the literal and the figurative science fiction has the capacity to accommodate objects of representation that are themselves neither entirely figurative nor entirely literal in nature Chu explores the globalized world cyberspace war trauma the Korean concept of han and the rights of robots all as referents for which she locates science fictional representations in poems novels music films visual pieces and other works ranging within and without previous demarcations of the science fiction genre In showing the divide between realism and science fiction to be illusory Do Metaphors Dream of Literal Sleep sheds new light on the value of science fiction as an aesthetic and philosophical resource one that matters more and more as our everyday realities grow increasingly resistant to straightforward representation

Who Shaped Science Fiction? Robert Sabella, 2000 This book combines the reading public's interest in science fiction with the always popular biography genre The book contains one hundred concise chapters each containing a brief biography of one of the most influential figures in the development of modern science fiction as well as a timetable detailing the highlights of the person's life and career Included are important editors such as John Campbell Jr and Hugo Gernsback filmmakers such as Gene Roddenberry and Stanley Kubrick and most importantly acclaimed writers ranging from historical figures Jules Verne Edgar Allan Poe Arthur Conan Doyle and H G Wells to modern masters Arthur Clarke Isaac Asimov and Robert Heinlein

The Mechanics of Wonder Gary Westfahl, 1998 This is a sustained argument about the idea of science fiction by a renowned critic Overturning many received opinions it is both controversial and stimulating Much of the controversy arises from Westfahl's resurrection of Hugo Gernsback for decades a largely derided figure as the true creator of science fiction Following an initial demolition of earlier critics Westfahl argues for Gernsback's importance His argument is fully documented showing a much greater familiarity with early American science fiction particularly magazine fiction than previous academic critics or historians After his initial chapters on Gernsback he examines the way in which the Gernsback tradition was adopted and modified by later magazine editors and early critics This involves a re-evaluation of the importance of John W Campbell to the history of science fiction as well as a very interesting critique of Robert Heinlein's *Beyond the Horizon* one of the seminal texts of American science fiction In conclusion Westfahl uses the theories of Gernsback and Campbell to develop a descriptive definition of science fiction and he explores the ramifications of that definition *The Mechanics of Wonder* will arouse debate and force the questioning of presuppositions No other book so closely examines the origins and development of the idea of science fiction and it will stand among a small number of crucial texts with which every science fiction scholar or prospective science fiction scholar will have to read

The Cultural Imaginary of Terrorism in Public Discourse, Literature, and Film Michael Frank, 2017-06-14 This study investigates the overlaps between political discourse and literary and cinematic fiction arguing that both are informed by and contribute to the cultural imaginary of terrorism Whenever mass mediated acts of terrorism occur they tend to trigger a proliferation of threat scenarios not only in the realm of literature and film but also in the statements of policymakers security experts and journalists In the process the discursive boundary between the factual and the speculative can become difficult to discern To elucidate this phenomenon this book proposes that terror is a halfway house between the real and the imaginary For what characterizes terrorism is less the single act of violence than it is the fact that this act is perceived to be the beginning or part of a potential series and that further acts are expected to occur As turn of the century writers such as Stevenson and Conrad were the first to point out this gives terror a fantastical dimension a fact reinforced by the clandestine nature of both

terrorist and counter terrorist operations Supported by contextual readings of selected texts and films from *The Dynamiter* and *The Secret Agent* through late Victorian science fiction to post 9 11 novels and cinema this study explores the complex interplay between actual incidents of political violence the surrounding discourse and fictional engagement with the issue to show how terrorism becomes an object of fantasy Drawing on research from a variety of disciplines *The Cultural Imaginary of Terrorism* will be a valuable resource for those with interests in the areas of Literature and Film Terrorism Studies Peace and Conflict Studies Trauma Studies and Cultural Studies
