

What is Blockchain?

Cryptocurrency

The requested transaction will then be broadcasted to a P2P network consisting of computers, known as nodes.

A verified transaction can involve cryptocurrency, contracts, records or other information.

VALIDATION:
The network of nodes validates the transaction and the user's status using known algorithms.

Someone requests a transaction.

Once verified, the transaction is combined with other purchases to create a new block of data for the ledger.

The new block is then added to the existing blockchain, in a way that is permanent and unalterable.

The transaction is complete.

Has no intrinsic value in that is not another commodity such as gold.

Has no physical form and exists only in the network.

A central bank does not determine its supply and the network is entirely decentralized.

Technologies and Trends in the Halal Industry Nor Aida Abdul Rahman, Kamran Mahroof, Azizul Hassan, 2023-11-22

With recent technological developments touted also as Industry 4.0 numerous articles published over the years have emphasized the need to investigate the role of technology across all sectors including the halal industry. This book provides a greater understanding of the technologies, trends, and debates associated with the halal industry from different sectors such as food, logistics, pharmaceutical, tourism, medical, cosmetic, and the retail sector. The book adds substantial discussion to the issues and trends of technology applications in the halal industry as well as the theories underpinning halal technology studies. It is in four sections: an overview of the halal industry, selected theories, technology, and recent issues. The contributors explore how technology has evolved and been applied in industry and also look at how Industry 4.0 technologies like blockchain, Internet of Things (IoT), automation, machine learning, and augmented reality are being integrated in the halal supply chain process. Written by well-regarded scholars and international academics from Africa, Europe, Middle East, and Asia, this book provides expert contributions from research, regulatory, and industry perspectives. This book will interest upper-level students, scholars, academics, and practitioners in the various disciplines of tourism and travel, hospitality, food studies, marketing, pharmaceutical, and medical logistics management, Islamic studies, and information technology in the halal industry.

Digitization In Supply Chain Management: Trends, Challenges And Solutions Steven Carnovale, Sengun

Yeniyurt, 2024-03-15 Every industry has faced the tidal wave of digital that has either re-shaped or dramatically altered their modus operandi. Supporting technologies in the management information systems arena have given rise to increased end-to-end visibility, real-time access to information, and tightly controlled monitoring of deployed assets. In many industries, it is straightforward to see the impact that digital technologies have had. Finance is a great example with cash payments becoming increasingly less and less common and digital currencies increasing in prominence. Yet how has this impacted supply chain management? In a discipline that spans multiple industries, continents, and companies, are there examples that we can point to that explain how digital supply chains have become? Which aspects of supply chain management were transformed by the digital tidal wave, and which functions are lagging behind? This is what this volume seeks to address. **Trends** what are the current trends in digital or digitalization supply chain management? Ideally, these trends will include all aspects of the supply chain. That is, how has the digital revolution impacted sourcing? What are the digital trends in the logistics, warehousing, and distribution industry? How has digital impacted the operations and manufacturing industry? **Challenges** where are the diminishing returns to digital and its inclusion in the supply chain? Are there problems related to procurement and sourcing as the digital revolution takes hold? Are logistics challenges compounded in a digital world? Is manufacturing more streamlined, or are there additional complexities that need to be addressed? **Solutions** Are the challenges all too overwhelming, or are there remedies that we can advance to cope with an ever-increasingly digital world? Evaluation of Potential Use Cases for Blockchain in the Insurance Industry Ricardo Escoda, 2021-03-09 Master's Thesis from the year 2020 in the subject Economics Finance grade 1-3 International School of Management Campus Munich language English abstract Blockchain is considered to be a breakthrough technology with many strengths and opportunities but also weaknesses and threats for all industries around the globe. It has the potential to revolutionize many sectors but it is not a universal remedy and does not replace every single traditional technology. Most businesses do feel insecure whether to invest time and money for Research and Development due to the lack of industry standards and regulations with respect to the technology. Before being able to guarantee suitability and successful implementation in any business, it is essential to

study the differences between public private hybrid and consortium Blockchain types In areas of application not strongly relying on Blockchain s distributed systems alternative solutions such as Big Data Analytics Artificial Intelligence and Machine Learning might be more valuable Nonetheless Blockchain promises the unique potential for insurance companies to efficiently serve global markets with areas of application mainly concentrating on parts of the VC where bureaucracy can be reduced by automation For instance the use of Smart Contracts where lots of data are analyzed saved distributed and processed By implementing BC fields where the focus is on customer experience such as Payments Data Security Transparency and Developing New Business and Product Ideas can be improved enormously Use cases and new products supported by Blockchain might include P2P Micro Insurances Ad hoc and Parametric Insurance Models Automized Underwriting Reduction of Fraud and Abuse and Health Insurance Processes Real Time Analytics in the Form of SCs Instant Pay Outs Automized Claims Management and Improved Risk Modelling of Insurance Businesses might be achievable by connecting Blockchain and Big Data Contrary to the expectations of the author most industry experts are aware of the benefits and opportunities the technology can bring to their companies Still Blockchain is not anchored in their medium to long term visions and strategies Most of the interviewees would rather act as active observers and early followers than taking the lead proactively Reasons for this behavior are the lack of market standards and regulations the absence of solid Blockchain networks and the shortage of use cases but also the lack of know how and data security concerns
