The Process of Rural Transformation Iván Völgyes, Richard E. Lonsdale, William P. Avery, 1980 Rural transformation a field for comparative study The changing rural environment Economic change in the rural sphere Politica and social change among the peasantry patterns in rural transformation *Rural Women And State Policy* Carmen Diana Deere, Magdalena Leon, 2019-09-05 First published in 1987 An evaluation of the decade in conjunction with the 45th International Congress of Americanists hosted by the University of Los Andes in Bogota Colombia in July 1985 This book grew out of a collaborative effort by North American European and Latin American researchers to synthesize what we have learned about the position of rural women in Latin America over the past decade **Rural Development in Latin America an Evaluation and a Proposal** , 1989 **Potentials for Agricultural and Rural Development in Latin America and the Caribbean** , 1988 Annex II focuses on rural poverty and specific measures that could be taken to reduce it while laying the foundation for sustainable economic and incomes growth in rural areas *Handbook of Rural Development* Gary Paul Green, 2013-12-27 Rural development policies have historically focused primarily on increasing agricultural productivity but this volume demonstrates the need for a much broader approach as rural producers become increasingly integrated into the global economy Followi *The Oxford Handbook of Latin American Economics* José Antonio Ocampo, Jaime Ros, 2011-07-28 A comprehensive overview of the key factors affecting the development of Latin American economies that examines long term growth performance macroeconomic issues Latin American economies in the global context technological and agricultural policies and the evolution of labour markets the education sector and social security programmes **Decentralized Development in Latin America** Paul Lindert, Otto Verkoren, 2010-03-02 Much of the scholarly and professional literature on development focuses either on the macro level of national policies and politics or on the micro level of development projects

and household or community socio economic dynamics By contrast this collection pitches itself at the meso level with a comparative exploration of the ways in which local institutions municipalities local governments city authorities civil society networks and others have demanded and taken on a greater role in planning and managing development in the Latin American region The book s rich empirical studies reveal that local institutions have engaged upwards with central authorities to shape their policy and resource environments and in turn been pressured from below by local actors contesting the ways in which the structures and processes of local governance are framed The examples covered in this volume range from global cities such as Mexico and Santiago to remote rural areas of the Bolivian and Brazilian Amazon As a result the book provides a deep understanding of the diversity and complexity of local governance and local development in Latin America while avoiding the stereotyped claims about the impact of globalisation or the potential benefits of decentralisation as frequently stated in less empirically grounded analysis
